### Consumer Confidence Report Certification Form (to be submitted with a copy of the CCR)

(to certify electronic delivery of the CCR, use the certification form on the State Board's website at [http://www.waterboards.ca.gov/drinking\\_water/certlic/drinkingwater/CCR.shtml](http://www.waterboards.ca.gov/drinking_water/certlic/drinkingwater/CCR.shtml))

Water System Name: Maxwell Public Utilities District

Water System Number: 0610003

The water system named above hereby certifies that its Consumer Confidence Report was distributed on 5-8-2020 to customers (and appropriate notices of availability have been given). Further, the system certifies that the information contained in the report is correct and consistent with the compliance monitoring data previously submitted to the State Water Resources Control Board, Division of Drinking Water.

Certified by: Name: Kurt Chambers

Signature: 

Title: Operator D1

Phone Number: ( 530 ) 438-2505

Date: 5-8-2020

*To summarize report delivery used and good-faith efforts taken, please complete the below by checking all items that apply and fill-in where appropriate:*

☒ CCR was distributed by mail or other direct delivery methods. Specify other direct delivery methods used: \_\_\_\_\_

☒ "Good faith" efforts were used to reach non-bill paying consumers. Those efforts included the following methods:

☒ Posting the CCR on the Internet at www.maxwellpud.myruralwater.com

☐ Mailing the CCR to postal patrons within the service area (95955)

☐ Advertising the availability of the CCR in news media (attach copy of press release)

☐ Publication of the CCR in a local newspaper of general circulation (attach a copy of the published notice, including name of newspaper and date published)

☒ Posted the CCR in public places (Post Office Counter, PUD Office Counter)

☐ Delivery of multiple copies of CCR to single-billed addresses serving several persons, such as apartments, businesses, and schools

☐ Delivery to community organizations (attach a list of organizations)

☐ Other (attach a list of other methods used)

☐ For systems serving at least 100,000 persons: Posted CCR on a publicly-accessible internet site at the following address: www.\_\_\_\_\_

☐ For privately-owned utilities: Delivered the CCR to the California Public Utilities Commission

*This form is provided as a convenience and may be used to meet the certification requirement of section 64483(c), California Code of Regulations.*

**Maxwell Public Utility District**  
**2019 Water Quality Consumer Confidence Report**  
**Public Water System Number 0610003**

(Este informe contiene información muy importante sobre su agua beber. Tradúzcalo ó hable con alguien que lo entienda bien.)

For additional information concerning your drinking water, contact **Kurt Chambers** at **530-438-2505**

Water for the Maxwell Public Utility District originates from two groundwater sources known as Well #4, and Well #5.

**DEFINITIONS OF SOME OF THE TERMS USED IN THIS REPORT:**

**Maximum Contaminant Level (MCL):** The highest level of a contaminant that is allowed in drinking water. Primary MCLs are set as close to the PHGs (or MCLGs) as is technologically, and economically feasible.

**Primary Drinking Water Standards (PDWS):** MCLs for contaminants that affect health along with their monitoring and reporting requirements, and surface water treatment requirements.

**Public Health Goal (PHG):** The level of a contaminant in drinking water below which there is no known or expected risk to health. PHGs are set by the California Environmental Protection Agency.

**Maximum Contaminant Level Goal (MCLG):** The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs are set by the Federal Environmental Protection Agency (USEPA).

**Regulatory Action Level (AL):** The concentration of a contaminant which, if exceeded, triggers treatment or other requirements that a water system must follow.

**DLR:** Detection Limit for Purposes of Reporting

**pCi/L:** picocuries per liter (a measure of radiation)

**ppb:** parts per billion or micrograms per liter

**ppm:** parts per million or milligrams per liter

**nd:** non detectable at testing limit

**TDS:** Total Dissolved Solids

**MICROBIOLOGICAL WATER QUALITY:**

Testing for bacteriological contaminants in the distribution system is required by State regulations. This testing is done regularly to verify that the water system is free from coliform bacteria. The minimum number of tests required per month is two. In our distribution system, we test the water once per month for coliform bacteria. The highest number of samples found to contain coliform bacteria during any one month in 2019 was zero.

All follow up samples were found to be absent of coliform bacteria. The highest number of samples found to contain coliform bacteria during any one month in 2019 was zero.

**LEAD & COPPER TESTING RESULTS:**

Lead & copper testing of water from individual taps in the distribution system is required by State regulations. The table below summarizes the most recent sampling for lead and copper.

	Year Tested	Number of samples collected	Number of samples required	90 <sup>th</sup> Percentile Result (ppm)	Action Level (ppm)
Lead	2017	10	10	N/D	0.015
Copper	2017	10	10	N/D	1.3

**GENERAL INFORMATION ON DRINKING WATER:**

All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the USEPA's Safe Drinking Water Hotline at 1-800-426-4791.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly individuals, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. The USEPA/Center for Disease Control guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline at 1-800-426-4791.

**Violation Information:**

State records indicate the Maxwell Public Utility District's Wells #4, and #5 exceeds the MCL for manganese. Manganese is on the State's Secondary Standards list of chemicals and there is no associated health risk for these levels of manganese in the drinking water and the State has requested no further action on our part at this time.

MPUD failed to collect routine water samples for the month of February, 2019.
