# APPENDIX B: eCCR Certification Form (Suggested Format)

## **Consumer Confidence Report Certification Form**

(To be submitted with a copy of the CCR)

Water System Name:	Ranch Road Estates Mutual Water Company
Water System Number:	1400031

The water system named above hereby certifies that its Consumer Confidence Report was distributed on **June 1**, **2021** to customers (and appropriate notices of availability have been given). Further, the system certifies that the information contained in the report is correct and consistent with the compliance monitoring data previously submitted to the State Water Resources Control Board, Division of Drinking Water (DDW).

Certified by:

Name: Joan Lewis	Title: Sect/Treas.
Signature: Juan Lewis	Date: June 1, 2021
Phone number: 760-873-6456	blank

To summarize report delivery used and good-faith efforts taken, please complete this page by checking all items that apply and fill-in where appropriate:

- CCR was distributed by mail or other direct delivery methods (attach description of other direct delivery methods used). Mailed to shareholder not having an email address.
- CCR was distributed using electronic delivery methods described in the Guidance for Electronic Delivery of the Consumer Confidence Report (water systems utilizing electronic delivery methods must complete the second page). <a href="mailed"><u>Emailed</u></a> <a href="mailed"><u>Shareholders</u></a>

"Goo	d faith"	efforts	were	used	to	reach	non-bill	paying	consumers.	Those	effort
	include	d the fol	llowing	meth	ods	:					
	Posting	the CC	R at th	ne follo	win	g URL	www				
	Mailing	the CC	R to po	ostal p	atro	ons with	nin the se	ervice ar	ea (attach zip		
	used)A release		ng the	availal	oility	y of the	CCR in	news m	edia (attach d	opy of p	ress
	Publica	ition of t	he CC	Rina	loca	al news	paper of	general	circulation (a	attach a	сору

Publication of the CCR in a local newspaper of general circulation (attach a copy of the published notice, including name of newspaper and date published)

Posted the CCR in public places (attach a list of locations)

Delivery of multiple copies of CCR to single-billed addresses serving several persons, such as apartments, businesses, and schools

Delivery to community organizations (attach a list of organizations)

Publication of the CCR in the electronic city newsletter or electronic community

newsletter or list sery (attach a copy of the article or notice) Electronic announcement of CCR availability via social media outlets (attach list of social media outlets utilized) Other (attach a list of other methods used) For systems serving at least 100,000 persons: Posted CCR on a publiclyaccessible internet site at the following URL: www. For privately-owned utilities: Delivered the CCR to the California Public Utilities Commission Consumer Confidence Report Electronic Delivery Certification Water systems utilizing electronic distribution methods for CCR delivery must complete this page by checking all items that apply and fill-in where appropriate. Water system mailed a notification that the CCR is available and provides a direct URL to the CCR on a publicly available website where it can be viewed (attach a copy of the mailed CCR notification). URL: www. Water system emailed a notification that the CCR is available and provides a direct URL to the CCR on a publicly available site on the Internet where it can be viewed (attach a copy of the emailed CCR notification). URL: www. Water system emailed the CCR as an electronic file email attachment. Water system emailed the CCR text and tables inserted or embedded into the body of an email, not as an attachment (attach a copy of the emailed CCR). Requires prior DDW review and approval. Water system utilized other electronic delivery method that meets the direct delivery requirement. Provide a brief description of the water system's electronic delivery procedures and include how the water system ensures delivery to customers unable to receive electronic delivery. CCR was distributed using electronic delivery methods described in the Guidance for Electronic Delivery of the Consumer Confidence Report. Shareholders without email delivery: 3 households had copies mailed. Email and US mail copies included the CCR Certification and the CCR Report.

This form is provided as a convenience and may be used to meet the certification requirement of section 64483(c) of the California Code of Regulations.

## **2020 Consumer Confidence Report**

### **Water System Information**

Water System Name: Ranch Road Estates Mutual Water Company

Report Date: June 1, 2021

Type of Water Source(s) in Use: Groundwater Wells

Name and General Location of Source(s): Well 01 NW & Well 02 SE are both located within subdivision

Drinking Water Source Assessment Information: Water source assessments completed in June 2011. The water source is considered to be most vulnerable to the following activities associated with detected nitrate contaminants: the sewer collection system located within the subdivision, fertilizer use, and neighborhood animal operations. The complete assessment is available for review at the Inyo County Environmental Health Services, 207 W South Street, Bishop, CA or call 760-873-7865.

Time and Place of Regularly Scheduled Board Meetings for Public Participation: Call for date and time

For More Information, Contact: Joan Lewis Phone: 760-873-6456

### **About This Report**

We test the drinking water quality for many constituents as required by state and federal regulations. This report shows the results of our monitoring for the period of January 1 to December 31, 2020 and may include earlier monitoring data.

Importance of This Report Statement in Five Non-English Languages (Spanish, Mandarin, Tagalog, Vietnamese, and Hmong)

Language in Spanish: Este informe contiene información muy importante sobre su agua para beber. Favor de comunicarse Ranch Road Estates Mutual Water Company a 760-872-1401 para asistirlo en español.

## **Terms Used in This Report**

	Term	Definition
Level 1	Assessment	A Level 1 assessment is a study of the water system to identify potential problems and determine (if possible) why total coliform bacteria have been found in our water system.
Level 2	Assessment	A Level 2 assessment is a very detailed study of the water system to identify potential problems and determine (if possible) why an <i>E. coli</i> MCL violation has occurred and/or why total coliform bacteria have been found in our water system on multiple occasions.
Maximu Level (N	m Contaminant ICL)	The highest level of a contaminant that is allowed in drinking water. Primary MCLs are set as close to the PHGs (or MCLGs) as is economically and technologically feasible. Secondary MCLs are set to protect the odor, taste, and appearance of drinking water.
	m Contaminant oal (MCLG)	The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs are set by the U.S. Environmental Protection Agency (U.S. EPA).
	m Residual tant Level	The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.
	m Residual tant Level Goal 6)	The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.
	Drinking Water ds (PDWS)	MCLs and MRDLs for contaminants that affect health along with their monitoring and reporting requirements, and water treatment requirements.
Public H (PHG)	ealth Goal	The level of a contaminant in drinking water below which there is no known or expected risk to health. PHGs are set by the California Environmental Protection Agency.
Regulato (AL)	ory Action Level	The concentration of a contaminant which, if exceeded, triggers treatment or other requirements that a water system must follow.
Seconda Water St (SDWS)	ary Drinking andards	MCLs for contaminants that affect taste, odor, or appearance of the drinking water. Contaminants with SDWSs do not affect the health at the MCL levels.
Treatme	nt Technique	A required process intended to reduce the level of a contaminant in drinking water.
Variance Exemption		Permissions from the State Water Resources Control Board (State Board) to exceed an MCL or not comply with a treatment technique under certain conditions.
ND		Not detectable at testing limit.
ppm		parts per million or milligrams per liter (mg/L)
ppb		parts per million or milligrams per liter (mg/L)
ppt		parts per trillion or nanograms per liter (ng/L)
NTU		nephelometric turbidity units (a measure of cloudiness)
us/cm		microSiemens per centimeter (a measure of electric conductivity)
pCi/L		picocuries per liter (a measure of radiation)

## Sources of Drinking Water and Contaminants that May Be Present in Source Water

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water include:

- Microbial contaminants, such as viruses and bacteria, that may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
- Inorganic contaminants, such as salts and metals, that can be naturally-occurring or result from urban stormwater runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.
- Pesticides and herbicides, that may come from a variety of sources such as agriculture, urban stormwater runoff, and residential uses.
- Organic chemical contaminants, including synthetic and volatile organic chemicals, that are byproducts of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, agricultural application, and septic systems.
- Radioactive contaminants, that can be naturally-occurring or be the result of oil and gas production and mining activities.

## Regulation of Drinking Water and Bottled Water Quality

In order to ensure that tap water is safe to drink, the U.S. EPA and the State Board prescribe regulations that limit the amount of certain contaminants in water provided by public water systems. The U.S. Food and Drug Administration regulations and California law also establish limits for contaminants in bottled water that provide the same protection for public health.

## **About Your Drinking Water Quality**

## **Drinking Water Contaminants Detected**

Tables 1, 2, 3, 4, 5, 6, and 8 list all of the drinking water contaminants that were detected during the most recent sampling for the constituent. The presence of these contaminants in the water does not necessarily indicate that the water poses a health risk. The State Board allows us to monitor for certain contaminants less than once per year because the concentrations of these contaminants do not change frequently. Some of the data, though representative of the water quality, are more than one year old. Any violation of an AL, MCL, MRDL, or TT is asterisked. Additional information regarding the violation is provided later in this report.

Table 1. Sampling Results Showing the Detection of Coliform Bacteria

Microbiological Contaminants	Highest No. of Detections	No. of Months in Violation	MCL	MCLG	Typical Source of Bacteria
Total Coliform Bacteria (State Total Coliform Rule)	(In a month) 0]	0	1 positive monthly sample (a)	0	Naturally present in the environment
Fecal Coliform or E. coli (State Total Coliform Rule)	(In the year)	0	A routine sample and a repeat sample are total coliform positive, and one of these is also fecal coliform or <i>E. coli</i> positive	None	Human and animal fecal waste
E. coli (Federal Revised Total Coliform Rule)	(In the year)	0	(b)	0	Human and animal fecal waste

<sup>(</sup>a) Two or more positive monthly samples is a violation of the MCL (b) Routine and repeat samples are total coliform-positive and either is *E. coli*-positive or system fails to take repeat samples following *E. coli*-positive routine sample or system fails to analyze total coliform-positive repeat sample for *E. coli*.

Table 2. Sampling Results Showing the Detection of Lead and Copper

Lead and Copper	Sample Date	No. of Sam- ples Collect- ed	90 <sup>th</sup> Percen- tile Level Detected	No. Sites Exceed -ing AL	AL	PHG	No. of Schools Requesting Lead Sampling	Typical Source of Contaminant
Lead (ppb)	8/13/19	5	0	0	15	0.2	Not applicable	Internal corrosion of household water plumbing systems; discharges from industrial manufacturers; erosion of natural deposits
Copper (ppm)	8/13/19	5	0.255	0	1.3	0.3	Not applicable	Internal corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives

Table 3. Sampling Results for Sodium and Hardness

Chemical or Constituent (and reporting units)	Sample Date	Level Detected	Range of Detections	MCL	PHG (MCLG)	Typical Source of Contaminant
Sodium (ppm)	7/23/19	5.1	5.1	None	None	Salt present in the water and is generally naturally occurring
Hardness (ppm)	7/23/19	48	46-50	None	None	Sum of polyvalent cations present in the water, generally magnesium and calcium, and are usually naturally occurring

Table 4. Detection of Contaminants with a Primary Drinking Water Standard

Sample Date	Level Detected	Range of Detections	MCL [MRDL]	PHG (MCLG) [MRDLG]	Typical Source of Contaminant
N/A	N/A	N/A	N/A	N/A	N/A
	Date	Date Detected	Date Detected Detections	Date Detected Detections [MRDL]	Date Detected Detections [MRDL] (MCLG) [MRDLG]

Table 5. Detection of Contaminants with a Secondary Drinking Water Standard

Chemical or Constituent (and reporting units)	Sample Date	Level Detected	Range of Detections	SMCL	PHG (MCLG)	Typical Source of Contaminant
Specific Conductance (uS/em)	7/23/19	82	78-86	1600	N/A	Substances that form ions when in water
Sulfate (mg/L)	7/23/19	5	4.9-5.2	500	N/A	Runoff/leaching from natural deposits
Total Dissolved Solids (mg/L)	7/23/19	85	83-87	1000	N/A	Runoff/leaching from natural deposits
Turbidity, Laboratory (NTU)	7/23/190	0.31	0.23-0.39	5.0	N/A	Soil runoff

 Table 6. Detection of Unregulated Contaminants

Chemical or Constituent (and reporting units)	Sample Date	Level Detected	Range of Detections	Notification Level	Health Effects Language
Vanadium (ug/L)	11/7/13	3	N/A	50 ug/L	Vanadium exposures resulted in developmental and reproductive effects in rats
Boron (mg/L)	11/7/13	0.1	N/A	1 mg/L	Boron exposures resulted in decreased fetal weight (developmental effects) in newborn rats

### Additional General Information on Drinking Water

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the U.S. EPA's Safe Drinking Water Hotline (1-800-426-4791).

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. U.S. EPA/Centers for Disease Control (CDC) guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbial contaminants are available from the Safe Drinking Water Hotline (1-800-426-4791).

Lead-Specific Language: If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. *Ranch Road Estates Mutual Water Company* is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. [Optional: If you do so, you may wish to collect the flushed water and reuse it for another beneficial purpose, such as watering plants.] If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline (1-800-426-4791) or at <a href="http://www.epa.gov/lead">http://www.epa.gov/lead</a>.

# Summary Information for Violation of a MCL, MRDL, AL, TT, or Monitoring and Reporting Requirement

Table 7. Violation of a MCL, MRDL, AL, TT or Monitoring Reporting Requirement

Explanation	Duration	Actions Taken to Correct Violation	Health Effects Language
N/A	N/A	N/A	N/A
			Correct violation

### For Water Systems Providing Groundwater as a Source of Drinking Water

Table 8. Sampling Results Showing Fecal Indicator-Positive Groundwater Source Samples

Microbiological Contaminants (complete if fecal- indicator detected)	Total No. of Detections	Sample Dates	MCL [MRDL]	PHG (MCLG) [MRDLG]	Typical Source of Contaminant
E. coli	(In the year) 0	N/A	0	(0)	Human and animal fecal waste
Enterococci	(In the year) 0	N/A	тт	N/A	Human and animal fecal waste
Coliphage	(In the year) 0	N/A	TT	N/A	Human and animal fecal waste

Summary Information for Fecal Indicator-Positive Groundwater Source Samples, Uncorrected Significant Deficiencies, or Violation of a Groundwater TT

#### Special Notice of Fecal Indicator-Positive Groundwater Source Sample:

There were NO fecal indicator-positive groundwater source samples during 2020

#### **Special Notice for Uncorrected Significant Deficiencies:**

There were NO uncorrected significant deficiencies during 2020

Table 9. Violation of Groundwater TT

Violation	Explanation	Duration	Actions Taken to Correct Violation	Health Effects Language
There were NO groundwater treatment technique violations to report	N/A	N/A	N/A	N/A

## Summary Information for Operating Under a Variance or Exemption

NONE: this system did NOT operate under a variance or exemption in 2020

# Summary Information for Federal Revised Total Coliform Rule Level 1 and Level 2 Assessment Regirements

During the past year (2020), we DID NOT find E.coli nor coliform bacteria and therefore we were NOT required to conduct a Level 1 or 2 assessment for our water system. No corrective actions required.
