sources to provide long-term operation and maintenance support for the water treatment plant and distribution system.

Agency Review:

There was no additional involvement required or needed for this project. Division of Drinking Water (DDW) had conducted a Sanitary Survey inspection of the water system on April 27, 2017 and provided a report of their findings in a DDW letter dated August 4, 2017. The report indicated equipment that had failed and resulted in finished water not meeting drinking water standards. Equipment ordered allows the arsenic treatment plant to operate in compliance with the water system's DDW permit.

Certification

The undersigned hereby certify that the project was completed with deliverables meeting the intent of the approved project development funding.
