

APPENDIX B: eCCR Certification Form (Suggested Format)

Consumer Confidence Report Certification Form

(To be submitted with a copy of the CCR)

Water System Name:	City of Cerritos
Water System Number:	1910019

The water system named above hereby certifies that its Consumer Confidence Report was distributed on 06/14/2023 (date) to customers (and appropriate notices of availability have been given). Further, the system certifies that the information contained in the report is correct and consistent with the compliance monitoring data previously submitted to the State Water Resources Control Board, Division of Drinking Water (DDW).

Certified by:

Name: Jose Arroyo-Gutierrez	Title: Water Superintendent
Signature: <i>Jose Arroyo</i>	Date: 06/09/2023
Phone number: (562) 407-2654	blank

To summarize report delivery used and good-faith efforts taken, please complete this page by checking all items that apply and fill-in where appropriate:

- ☐ CCR was distributed by mail or other direct delivery methods (attach description of other direct delivery methods used).
- ☐ CCR was distributed using electronic delivery methods described in the Guidance for Electronic Delivery of the Consumer Confidence Report (water systems utilizing electronic delivery methods must complete the second page).
- ☒ "Good faith" efforts were used to reach non-bill paying consumers. Those efforts included the following methods:
 - ☒ Posting the CCR at the following URL: www.cerritos.us/ccr2022.pdf
 - ☐ Mailing the CCR to postal patrons within the service area (attach zip codes used)
 - ☐ Advertising the availability of the CCR in news media (attach copy of press release)
 - ☒ Publication of the CCR in a local newspaper of general circulation (attach a copy of the published notice, including name of newspaper and date published)
 - ☐ Posted the CCR in public places (attach a list of locations)

- ☐ Delivery of multiple copies of CCR to single-billed addresses serving several persons, such as apartments, businesses, and schools
- ☐ Delivery to community organizations (attach a list of organizations)
- ☐ Publication of the CCR in the electronic city newsletter or electronic community newsletter or listserv (attach a copy of the article or notice)
- ☐ Electronic announcement of CCR availability via social media outlets (attach list of social media outlets utilized)
- ☐ Other (attach a list of other methods used)
- ☐ *For systems serving at least 100,000 persons:* Posted CCR on a publicly-accessible internet site at the following URL: www._____
- ☐ *For privately-owned utilities:* Delivered the CCR to the California Public Utilities Commission

Consumer Confidence Report Electronic Delivery Certification

Water systems utilizing electronic distribution methods for CCR delivery must complete this page by checking all items that apply and fill-in where appropriate.

- ☒ Water system mailed a notification that the CCR is available and provides a direct URL to the CCR on a publicly available website where it can be viewed (attach a copy of the mailed CCR notification). URL: www.cerritos.us/ccr2022.pdf
- ☐ Water system emailed a notification that the CCR is available and provides a direct URL to the CCR on a publicly available site on the Internet where it can be viewed (attach a copy of the emailed CCR notification). URL: www._____
- ☐ Water system emailed the CCR as an electronic file email attachment.
- ☐ Water system emailed the CCR text and tables inserted or embedded into the body of an email, not as an attachment (attach a copy of the emailed CCR).
- ☐ *Requires prior DDW review and approval.* Water system utilized other electronic delivery method that meets the direct delivery requirement.

Provide a brief description of the water system's electronic delivery procedures and include how the water system ensures delivery to customers unable to receive electronic delivery.

*This form is provided as a convenience and may be used to meet the certification
requirement of
section 64483(c) of the California Code of Regulations.*

City of Cerritos 2022 Consumer Confidence Report

The City of Cerritos is committed to providing patrons with high quality drinking water that meets all federal and state standards. The Consumer Confidence Report (CCR) is an annual drinking water quality report that the Safe Drinking Water Act requires community water systems to provide to their consumers. The purpose of the CCR is to educate consumers about the quality of their drinking water, where their drinking water comes from, and the right to know about the water that they are consuming. We take our responsibilities to our community very seriously. To safeguard our continued exceptional water quality provided to nearly 50,000 residents, our skilled staff ensure that the water we serve meets or exceeds federal and state water quality standards.

We are pleased to inform you that the Cerritos tap water met all United States Environmental Protection Agency and State of California primary drinking water standards for 2022. Our water quality staff collected over 2,000 water samples in 2022. These samples were sent to independent laboratories certified by the State Water Resources Control Board and hired by the City to perform all the necessary analyses. We are proud to provide our customers with reliable, affordable, and exceptional quality drinking water.

This report provides information on the water quality testing completed in 2022, and details the results of the City's ongoing testing and reporting efforts. The bottom line is that Cerritos water complies with, and in many cases exceeds, all primary state and federal water quality standards for this reporting period.

The City of Cerritos has provided an annual Consumer Confidence Report to its customers since 1990, in compliance with state regulations adopted in 1989.

Where Does My Tap Water Come From?

The City of Cerritos receives its water supply from two water sources: surface water from the Metropolitan Water District of Southern California (MWD) and groundwater pumped from the Central Groundwater Basin. MWD water is transported from the Colorado River and the State Water Project in Northern California. In 2022, the City was able to supply most of its drinking water from local groundwater sources, with a small portion, about 41.8 million gallons or 2 percent of the City's total drinking water supply, purchased from MWD.

Every five years, the MWD is required by the California Department of Water Resources to conduct an initial source water assessment to examine possible sources of drinking water contamination and to recommend actions to better protect these source waters. The most recent MWD Watershed Sanitary Surveys were completed in 2016 for the Colorado River and in 2017 for the State Water Project. The Colorado River and State Water Project each have different water quality challenges. Water from the Colorado River is considered to be most vulnerable to contamination from recreation, urban/storm water runoff, increasing urbanization in the watershed and wastewater. Water supplies from Northern California's State Water Project are most vulnerable to contamination from urban/storm water runoff, wildlife, agriculture, recreation and wastewater. Each of these elements makes the source waters vulnerable to potential contamination. The MWD and other water agencies take special measures to protect water at the source and invest resources to support improved watershed protection programs. For more information on the Metropolitan Water District of Southern California, visit MWD's website at mwdh2o.com.

The City also receives groundwater from three groundwater wells located at various locations within the city. These wells, drilled to a depth from 640 feet to 1,000 feet, supplied 2.42 billion gallons which was 98 percent of the City's total drinking water supply in 2022. The water is pumped at the individual well heads; treated with chlorine to disinfect the water from microbial contaminants; and then distributed to a population of approximately 50,000 people through a large City-owned water distribution system. The water distribution system consists of approximately 181 miles of pipes ranging in size from 30-inch diameter down to 4-inch diameter, and supplies domestic drinking water to some 16,000 services, including residential, commercial and industrial users. The water system includes one 12-million-gallon reservoir with a booster pumping station capable of delivering about 18,000 gallons per minute, and two 6-million gallon reservoirs with a booster station capable of delivering about 17,000 gallons per minute. These reservoirs, with their combined 24-million-gallon capacity, provide more than enough water storage to meet the City's peak demand periods and any potential fire-flow or emergency requirements.

The City of Cerritos groundwater is pumped from the Central Groundwater Basin. The Central Basin is a series of large natural aquifers below the ground that stretch from Los Angeles to Orange County. Water in these aquifers comes from natural inflows of rainfall and snow melt, artificial inflows from imported and recycled water, as well as groundwater underflow from adjacent basins. Spreading grounds located at the major inflows from the Rio Hondo and San Gabriel Rivers of the Montebello Forebay allow water from various sources to artificially seep down into the Central Basin aquifers. Therefore, as surface water slowly percolates through the ground to the aquifers, the ground acts as a natural filter to clean the water.

In 2013, the State of California Division of Drinking Water (DDW) completed an assessment of City's groundwater supplies. The assessment established that the groundwater supplies are most vulnerable to automobile gas stations, chemical/petroleum processing/storage, known contaminant plumes, contractor or government agency equipment storage yards, parks, freeway/state highways transportation corridors, herbicide use in road rights-of-way, water wells, dry cleaners, metal plating/finishing/fabricating, automobile repair shops, utility station maintenance areas, and wastewater treatment plants. A copy of the approved assessment may be obtained by contacting the Cerritos Water Division at (562) 407-2674.

How Is My Drinking Water Tested?

The State of California DDW allows some constituents to be tested less than once a year because the concentrations of these constituents do not change frequently. City wells are monitored at least once a month for microbiological and physical quality. Additional samples are collected and analyzed for various chemical, radiological and aesthetic quality constituents.

Our water quality professionals collect approximately 20 samples each week in the distribution system to test for microbiological quality, monthly for physical quality and quarterly for total trihalomethane formation, which is a byproduct that results when chlorine is added to water with high levels of natural organics. Independent laboratories certified by the State are hired by the City to perform all the necessary analyses.

What Are Drinking Water Standards?

With regard to the regulation of water constituents, there are two types of limits, known as standards. Primary standards set limits for substances that may be harmful to humans if consumed in large quantities over certain periods of time. Secondary standards are limits for substances that could affect the water's taste, odor, and appearance. State and federal regulations set a Maximum Contaminant Level (MCL) for each of the primary and secondary standards. The MCL is the highest level of a substance that is allowed in drinking water.

There are over 100 standards set by the California Department of Water Resources for compounds that could be found in drinking water. The City has sampled and tested for every applicable compound. If in the past year, any water samples ever tested positive for any of these contaminants, they are listed in the Water Quality Table. If they were not detected, they are not included in the Water Quality Table.

How Do I Read the Water Quality Table?

The table in this report lists all of the contaminants for which state or federal standards have been set that the City detected during the current reporting period. The presence of these contaminants does not necessarily mean that the water poses a health risk. The water quality test results are divided into two main sections: those related to Primary Standards, and those related to Secondary Standards. The primary standards section is further divided by sampling locations. "Monitored at the Source" identifies contaminants that are measured at the well or surface water source. "Monitored in the Distribution System" means the samples were taken from water sampling points located throughout our service area. "At the Tap" means samples were taken from customers' faucets.

The first column of the water quality table lists substances that have been detected through testing. The water delivered in Cerritos is a blend of three wells and treated surface water obtained from MWD. Therefore, the next columns list the average concentration and range of concentrations found in the well water and MWD surface water. Following are columns that list the MCL and Public Health Goals (PHG) or Maximum Contaminant Level Goals (MCLG), if appropriate. The last column describes the likely sources of substances in drinking water.

To review the quality of your drinking water, compare the highest concentration and the MCL. Check for substances greater than the MCL. No regulated or unregulated organic compounds were detected in groundwater other than Trichloroethylene (TCE), 1,1-Dichloroethylene (1,1-DCE), and Tetrachloroethylene (PCE) which was found in one well at a concentration below the MCL. Some health issues have been associated with people who drink water containing TCE, PCE and 1,1-DCE in excess of the MCL over the course of many years. The concentration of TCE, PCE and 1,1-DCE in Cerritos, however, is well below the MCL.

Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Cerritos is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. If lead is present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you do so, you may wish to collect the flushed water and reuse it for another beneficial purpose, such as watering plants. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at www.epa.gov/lead.

Detected substances that exceed a PHG or MCLG must be reported. PHGs are set by the California Environmental Protection Agency. PHGs provide more information on the quality of drinking water to customers, and are similar to their federal counterparts, MCLGs. Both PHGs and MCLGs are levels that are of an advisory nature only and unenforceable. Both PHGs and MCLGs are concentrations of a substance at which there are no known or expected health risks. The regulations require a listing of the PHG and/or MCLG for each detected chemical contaminant, a definition of terms, information on violations, and a statement about health concerns of chemicals detected above regulatory limits. Some additional substances of interest are listed even though no PHG or MCLG has been established.

What Affects the Contents of Water?

All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. As water travels over the surface of the land or through the ground, it can pick up substances resulting from the presence of animals or from human activity. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the U.S. Environmental Protection Agency's (U.S. EPA) Safe Drinking Water Hotline at (800) 426-4791.

You can get more information on tap water by logging on to the U.S. EPA's helpful water website at water.epa.gov/drink.

What Does the U.S. EPA Say About Drinking Water Quality?

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and, in some cases, radioactive material. The City of Cerritos conducts regular testing as prescribed by state and federal agencies to ensure that none of the contaminants listed below are detected at levels considered to be harmful by the health agencies.

Contaminants that may be present in source water include:

- Microbial contaminants, including viruses and bacteria, that may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
- Inorganic contaminants, such as salts and metals, that can be naturally occurring or result from urban storm water runoff, industrial or domestic wastewater discharges, oil and gas production, mining or farming.
- Pesticides and herbicides, which may come from a variety of sources such as agriculture, urban storm water runoff, and residential uses.
- Organic chemical contaminants, including synthetic and volatile organic chemicals, that are byproducts of industrial processes and petroleum production, and can also come from gas stations, urban storm water runoff, and septic systems.
- Radioactive contaminants, which can be naturally occurring or be the result of oil and gas production and mining activities.

To ensure that tap water is safe to drink, the U.S. EPA and the California Department of Water Resources prescribe regulations that limit the amount of certain contaminants in water provided by public water systems.

Should I Take Additional Precautions?

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. The U.S. EPA/Centers for Disease Control guidelines on appropriate means to lessen the risk of infection of Cryptosporidium and other microbial contaminants are available from the U.S. EPA's Safe Drinking Water Hotline at (800) 426-4791.

How Can I Participate in Decisions on Water?

Decisions about your water system are made at Cerritos City Council meetings, which are regularly scheduled at the City Hall Council Chambers at 7 P.M. on the second and fourth Thursday of every month. Council meetings are broadcast live on Cerritos TV3 and meeting videos are archived on the City's website. If you have specific questions about your tap water quality, please contact the Cerritos Water Division at (562) 407-2674.

Total Organic Carbon (mg/l)	NR	NR	2.5	2.3 - 2.6	1.5	1.0 - 1.4	2.4	1.7 - 2.6	2.4	-
Turbidity + combined filter effluent										
Metropolitan Water District										
1) Highest single turbidity measurement (NTU)	0.3	0.30		0.500			0.600		0.600	Contaminant Source
2) Percentage of samples less than or equal to 0.3 NTU	95%	100%		100%			100%		100%	TT
3) Turbidity is a measure of the cloudiness of the water, an indication of particulate matter, some of which might include harmful microorganisms. Low turbidity in Metropolitan's treated water is a good indicator of effective filtration. Filtration is called a "treatment technique" (TT). A treatment technique is a required process intended to reduce the level of contaminants in drinking water that are difficult and sometimes impossible to measure directly.										

Abbreviations

MWD - Metropolitan Water District of Southern California	NTU = nephelometric turbidity units
pCi/l - picocuries per liter	µmhos/cm = micromhos per centimeter
NR - constituent not required to be tested	ND = constituent not detected at the reporting limit
PHG = Public Health Goal	MCL = Maximum Contaminant Level

Definitions

Maximum Contaminant Level (MCL): The highest level of a contaminant that is allowed in drinking water. Primary MCLs are set as close to the PHGs (or MCLGs) as is economically and technologically feasible. Secondary MCLs are set to protect the color, taste, and appearance of drinking water.

Maximum Contaminant Level Goal (MCLG): The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs are set by the U.S. Environmental Protection Agency.

Maximum Residual Disinfectant Level (MRDL): The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary to control microbial contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG): The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

Public Health Goal (PHG): The level of a contaminant in drinking water below which there is no known or expected risk to health. PHGs are set by the California Environmental Protection Agency.

Treatment Technique (TT): A required process intended to reduce the level of a contaminant in drinking water.

Regulatory Action Level (AL): The concentration of a contaminant which, if exceeded, triggers treatment or other requirements that a water system must follow.

Primary Drinking Water Standard (PDWS): MCLs and MRDLs for contaminants that affect health along with their monitoring and reporting requirements, and water treatment requirements.

manganese secondary MCL was set to protect you against unpleasant aesthetic effects (e.g., color, taste, and odor) and the staining of plumbing fixtures (e.g., tubs and sinks) and clothing while washing. The high manganese levels are due to leaching of natural deposits. The manganese levels at Wells C-2 and C-4 were at 36 µg/L and 48 µg/L, respectively, in 2021, which are below the secondary MCL. In addition, phosphate is used post treatment to sequester the manganese in our water distribution system. The water sources from all of the City's wells are blended in the distribution system in an effort to reduce the concentration of manganese. Additionally, the City has collected select samples in the distribution system in the vicinity of the water source with manganese levels above the secondary MCL; the results show the quarterly running annual averages of the manganese levels at these select locations are below the secondary MCL.

(j) Manganese was included as part of the unregulated chemicals requiring monitoring.

The Cerritos News

CCPA unveils 2023–2024 Season lineup

The Cerritos Center for the Performing Arts 2023–2024 Season kicks off with a Pre-Season show featuring country star Trace Adkins on August 1.

The Cerritos Center for the Performing Arts (CCPA) is pleased to announce an exciting 2023–2024 Season.

The new season lineup showcases entertainment legends such as Johnny Mathis, The Commodores and The Spinners, and Richard Marx and KT Tunstall. Family-friendly acts include “Madagascar the Musical,” “Hip Hop Nutcracker” and “iLuminate.”

A digital version of the 2023–2024 Season Brochure can be viewed on the CCPA’s website at cerritoscenter.com. Brochures will be mailed in July. Cerritos residents will have an advance ticket purchase opportunity starting Saturday, July 1 at noon. Tickets go on sale to the general public on Friday, July 7 at 10 a.m. Order tickets at cerritoscenter.com or by calling the Ticket Office at (562) 916-8500.

Patrons enjoy significant discounts by subscribing to the Broadway or Rob Kapatow’s “What Makes It Great?” series. Discount series packages are available through the first event of each series. If ordering a series package online, seat selection is not available, and seats will be assigned based on best availability. If you would like to select your own seats for a series, please call (562) 916-8500 or visit the Ticket Office.

The popular “Choose Your Own Season” package offers a 10-percent discount and the flexibility to customize your own season with five or more performances if orders are placed by Friday, September 8. Pre-Season and Performance Partner Program events, 98° and All-4-One, Southern California Brass Consortium, “The Spirit of Harriet Tubman,” “Randy Otto as Winston Churchill,” series packages and select VIP packages are not eligible for the “Choose Your Own Season” package.

The CCPA thanks its 2023–2024 Season Sponsors, which include Aria, Cerritos Auto Square, George & Bev Ray, Los Angeles County Supervisor Janice Hahn and Yamaha.

The season kicks off with Pre-Season performances in August by Country music star Trace Adkins and Grammy winner Boyz Scaggs.

September shows include “Johnny Mathis – The Voice of Romance Tour” and The Temptations and The Four Tops.

October welcomes Dire Straits Legacy Tour 2023; “Garrison Keillor Tonight”; “Madagascar the Musical”; 98° and All-4-One; Smash Mouth and Spin Doctors; Dustbowl Revival with Special Guest Aaron Goodvin; Matt Mauser and The Pete Jacobs Big Band; Rob Kapatow’s “What Makes It Great?” presentation: “Appalachian Spring” with the California State University, Fullerton Symphony Orchestra; Terron Brooks: “The Soul of Broadway”; The Company Men: “The Ultimate Mix Tape”; “Lou Gramm the Original Voice of Foreigner and ASIA Featuring John Payne”; and The Commodores and The Spinners.

November’s lineup highlights Zeppelin USA Featuring Brody Dolyniuk; “The Voice” contestant Raelynn; “Hip Hop Nutcracker”; Southern California Brass Consortium; Grammy winner Richard Marx and Grammy nominee KT Tunstall; “Disney Pixar’s Coco Live-to-Film Concert”; “American Idol” alums Ruben Studdard and Clay Aiken with their joint “Twenty” tour; guitarist Ana Popovic and Quinn Sullivan; and “Mannheim Steamroller Christmas by Chip Davis.”

“I Love the 90’s Tour,” featuring Vanilla Ice, Rob Base, Tone Loc, Young MC and C+C Music Factory, kicks off December, which also brings back the annual favorite “Merry-Achi Christmas” with Sol de México de José Hernández, Mariachi Reyna de Los Angeles and DanzArts Sabor México Dance Company. The month’s lineup also includes “Home for the Holidays” with Peabo Bryson, Oleta Adams, The 5th Dimension and Haley Reinhart; the Performance Partner Program “Los Angeles Symphony Christmas Concert”; “Dave Koz and Friends Christmas Tour 2023”; “Tower of Power Holiday & Hits”; “Drumline Live Holiday Spectacular”; and the a cappella sensation Straight No Chaser.

January 2024 kicks off with Jazz trumpeter-vocalist-composer Jumaane Smith’s “Louis! Louis! Louis!”; “Animaniacs: In Concert”; “The Spirit of Harriet Tubman: I-Woman Show Featuring Leslie McCurdy”; and the Broadway hit “Jesus Christ Superstar.” The month concludes with Rob Kapatow’s “What Makes It Great?” presentation “Pathétique Piano Sonata.”

February showcases “The Life and Music of George Michael”; Vitamin String Quartet: “Featuring Music From Bridgerton”; Giada Valenti: “Songs From the Movies”; The Blind Boys of Alabama Featuring Special Guest Bobby Rush; “One Night of Queen”; “The Greatest Love of All Starring Belinda Davis: A Tribute to Whitney Houston”; the Pop-New Wave groups A Flock of Seagulls and Men Without Hats; and the Argentine Folk dance ensemble Malevo.

“Proud Tina: The Ultimate Tribute to Tina Turner” shakes things up in March, a month that also features Broadway’s Rock of Ages Band; “BENISE – Fiesta!”; and the family-friendly shows “It’s Magic!” and “iLuminate.” The month’s schedule also includes “Tribute to the Hollywood Icons”; “The Beat Goes On Starring Lisa McClowry as Cher”; the Indian ATMA Ensemble; Rob Kapatow’s “What Makes It Great?” presentation “Ladies of the Canyon (Music of Carole King and Joni Mitchell)”; and the Broadway Series musical “The Simon & Garfunkel Story.”

April starts with the Broadway Series classic “Little Women” and follows with Chubby Checker and Gary Lewis and The Playboys; Drum Tao; and “Tribute to the Count Basie and Duke Ellington Orchestras.”

The season concludes in May with “Latin Rock & R&B Show” featuring Cannibal and the Headhunters, Malo and Thee Midnites; the Broadway Series musical “Hairspray”; Riders in the Sky; “In the Mood”; and “Randy Otto as Winston Churchill: The Blitz.”

Tickets are on sale now for the pre-season performances by Trace Adkins on Tuesday, August 1 and Boz Scaggs on Saturday, August 19, in addition to the 98° and All-4-One performance on Tuesday, October 3. Order tickets for these shows at cerritoscenter.com or by calling the Ticket Office at (562) 916-8500. ■

Attend 50th Annual Let Freedom Ring Celebration

The community is invited to attend the City’s 50th Annual Let Freedom Ring Celebration on Tuesday, July 4 from 4 to 9 p.m. at the Cerritos Civic Center. The event includes entertainment, food trucks, games, rides and a bell-ringing ceremony, and culminates with a spectacular fireworks show at 9 p.m. Bring a blanket or chair to view the fireworks. Barbecues and picnicking are not allowed.

Discounted all-day ride wristbands, available for \$30 through 4 p.m. Monday, July 3, can be purchased at the Recreation Services Division counter at Cerritos City Hall (while supplies last). On Tuesday, July 4, the wristbands will be \$35. Wristbands will not be sold after 7:30 p.m. on July 4. Individual tickets are \$1.50 each.

For more information about the Let Freedom Ring Celebration, call the City’s Recreation Services Division at (562) 916-1254. ■

City facilities observe Independence Day

In observance of Independence Day, Cerritos City Hall, the City Clerk/Treasurer’s Office, Cerritos Library, Cerritos Senior Center at Pat Nixon Park, the Community Gymnasiums at Cerritos and Whitney high schools and the Cerritos Center for the Performing Arts Ticket Office will be closed on Tuesday, July 4. Cerritos Park East, Heritage Park and Liberty Park will be open from 10 a.m. to 8 p.m. The Cerritos Iron-Wood Nine Golf Course driving range will be open from 6 a.m. to 8 p.m. The Cerritos Sports Complex will be open from 2 to 8 p.m. and the Cerritos Olympic Swim and Fitness Center will be open from 7 a.m. to 2 p.m. ■

Fireworks prohibited in Cerritos

Residents are reminded that fireworks – including the “safe and sane” varieties sold in neighboring cities – are not allowed in Cerritos.

Cerritos Sheriff’s deputies will strictly enforce the law, which has helped protect thousands of residents from injuries and property damage. ■

City Council Recap

City Council/Successor Agency meetings are held at 7 p.m. on the second and fourth Thursday of every month. For details, call the Office of the City Clerk/Treasurer from 8 a.m. to 5 p.m., Monday through Friday at (562) 916-1248.

April 24, 2023

- Incorporated the consensus objectives and associated estimated costs of the Strategic Plan Goal Implementation Objectives, as presented in the associated agenda report, into the Fiscal Year 2023-24 preliminary budget document for review and consideration by the City Council during the upcoming budget study session process.

April 27, 2023

- Approved Councilmember Chuong Vo's nomination of Sean Wang to the Let Freedom Ring Committee, commencing April 27, 2023 and expiring April 30, 2024.
- Waived full reading of and adopted Ordinance No. 1042, an ordinance of the City of Cerritos, California establishing the City's General Municipal Election date as the first Tuesday after the first Monday in March of each odd-numbered year and repealing Ordinance No. 1036; and
- Authorized an amendment to the Fiscal Year 2022-23 adopted budget in the amount of approximately \$15,000 from the General Fund reserve to the Office of the City Clerk election expense account to fund costs related to the mandated written notification to Cerritos voters regarding the election date change; and
- Directed the City Clerk, serving as the City's Elections Official, to commence advance planning and negotiations with State-certified election vendors, consultants and other providers to reserve services, equipment, paper and other supplies necessary to conduct the election and present any necessary election-related funding, security upgrade projects and agreement requests as part of the scheduled City Council Fiscal Year 2023-24 and Fiscal Year 2024-25 budget study sessions.

- Made the findings set forth in Sections 1 through 8 of Resolution No. 2023-05, and incorporated by reference those findings, as they relate to the continued existence of a local emergency concerning a gasoline leak from a privately owned existing pipeline on the Cerritos Iron-Wood Nine public golf course; and
- Directed staff to provide a report to the City Council regarding the local emergency at least once every 60 days, pursuant to Section 8630(c) of the California Government Code, until the City Council terminates the local emergency.
- Approved and authorized the Mayor to execute a water rights lease agreement for a total of 250 acre-feet of groundwater by the City of Cerritos from the ABC Unified School District for each of Fiscal Years 2023-2024, 2024-2025 and 2025-2026 for a three-year total dollar amount of \$138,750.
- Waived full reading of and adopted Resolution No. 2023-16, a resolution of the City of Cerritos approving Conditional Use Permit 86-3(C) (2023) amendment, a request by The Car Group on behalf of the property owner to permit a new automobile dealership use at 11011 South Street, Cerritos, California, 90703. The subject property is zoned Development Area Five; and
- Waived full reading of and adopted Resolution No. 2023-17, a resolution of the City of Cerritos approving Precise Plan 71-14(F) (2023) amendment, a request by The Car Group on behalf of the property owner to demolish an existing automobile dealership building, construct a new automobile dealership building and complete other related site improvements at 11011 South Street, Cerritos, California, 90703. The subject property is zoned Development Area Five.
- Approved the recommendation by the Cerritos Planning Commission, on a vote of 4-0, with one Commissioner absent, to waive full reading of and adopt Resolution No. 2023-18, a resolution of the City of Cerritos approving Conditional Use Permit

- 2021-2(2023) amendment, a request by the property owners to amend project-specific condition of Approval 58, thereby extending the time frame for completion of improvements at 10603 Midway Avenue, Cerritos, California, 90703. The subject property is zoned Industrial Commercial Two.
- Waived full reading of and adopted Resolution No. 2023-19, a resolution of the City of Cerritos approving and certifying the mitigated negative declaration for a proposed industrial building under Conditional Use Permit 2023-1 and Precise Plan 2023-6; and
- Waived full reading of and adopted Resolution No. 2023-20, a resolution of the City of Cerritos approving Conditional Use Permit 2023-1, a request by the property owner to permit light industrial warehousing, wholesaling and manufacturing uses at 16323 Shoemaker Avenue, Cerritos, California, 90703. The subject property is zoned Development Area One; and
- Waived full reading of and adopted Resolution No. 2023-21, a resolution of the City of Cerritos approving Precise Plan 2023-6, a request by the property owner to demolish an existing industrial building, construct a new industrial building and complete other related site improvements at 16323 Shoemaker Avenue, Cerritos, California, 90703. The subject property is zoned Development Area One.
- Approved adjustments to the 2023 Council/Agency meeting schedule; and
- Directed staff to conduct public education and notification activities utilizing all appropriate City media outlets and methods as related to amendments to the 2023 Cerritos Public Meeting Schedule; and
- Present any other necessary proposed modifications to the 2023 Cerritos public meeting schedule to the Council/Agency for their review and consideration at the earliest possible date.
- Adjourned in memory of Cerritos resident Gayle Reidy.

Free vacation security checks offered to residents

The Cerritos Sheriff's Station/Community Safety Center offers free vacation security checks for residents. While you're away, a deputy or Volunteer on Patrol will check your home for broken windows, open doors or other evidence of suspicious activity.

Residents must fill out a vacation security check request form at least five business days before leaving on vacation. The form is available at safercerritos.com. Under the "Featured Links" section, click on "Crime Prevention: Hardening the Target" then "Vacation Security Check Request Form." All information must be completed before the request can be processed. If it is less than five business days before the start of your vacation, call (562) 916-1266 to submit a vacation security check request by phone.

Ensure that all doors and windows are locked before leaving for vacation. Notify the Cerritos Sheriff's Station at (562) 860-0044 if you return before the indicated return date. ■

Industrial building on Shoemaker Avenue approved

The Cerritos City Council has adopted a resolution clearing the way for a new industrial building at 16323 Shoemaker Avenue on the corner of Moore Street and Shoemaker Avenue.

The move greenlighted a request by the property owner Duke Realty Shoemaker LP to permit light industrial warehousing, wholesaling and manufacturing uses at the site. The project includes demolishing the existing 70,110-square-foot industrial structure and constructing a new 159,627-square-foot building. The work also involves site improvements such as new landscaping and new parking areas.

The proposed industrial building will adopt a contemporary design featuring smooth-finished, concrete form-liner tilt-up walls, grey decorative metal panels and an off-white-colored stacked stone veneer at the entrances.

The building's exterior will be a variation of white-and-grey-colored tones and the windows will be fitted with blue reflective glass. The roof design features skylights over the warehouse portion of the building.

The proposal includes dense landscaping throughout the property, featuring water-saving shrubs and ground cover. Tall shrubs will line the north and west property lines. New trees will include fruitless Olive trees, Chitalpa trees and African Sumac trees. ■

Household hazardous waste collection event planned

A free household hazardous waste collection event will be held on Saturday, July 29 from 9 a.m. to 3 p.m. at Cerritos College, Stadium Parking Lot C-1, located at 11110 Alondra Boulevard in Norwalk.

Sponsored by the Los Angeles County Public Works Department, the event provides Los Angeles County residents with the opportunity to legally dispose of unwanted household items that cannot be discarded in the regular trash.

Items that will be accepted include motor oil, antifreeze, paint, paint thinner, turpentine, cleaners with acids or lye, pesticides and herbicides, household and car batteries, old computers and televisions, used needles, expired pharmaceuticals and mercury thermometers.

Things that will not be accepted are explosives, ammunition or radioactive materials; trash or old tires; waste from businesses; and appliances such as washers, refrigerators, stoves and air-conditioners.

Bring items in sturdy boxes, preferably in their original labeled containers, and do not mix the products together. Be prepared to leave your containers. There is a limit of 15 gallons or 125 pounds of hazardous waste per trip.

For more information, contact Los Angeles County Public Works at (626) 458-5100 or pw@lacounty.gov. ■

SRP THANK YOU

Thank you to everyone who participated in the Cerritos Library's 48th Annual Summer Reading Program, "Find Your Voice." Thank you to the Friends of the Cerritos Library for sponsoring the program. Without your help, this program would not be possible. The Cerritos Library would like to extend its appreciation to the following businesses for their generous donation of prizes: California Pizza Kitchen, Chick-fil-A, Chipotle, Dairy Queen, Golf N' Stuff, The Habit Burger Grill, Islands Restaurant, Lazy Dog Restaurant, Panda Express, Raising Cane's, Rubio's Coastal Grill, Tapioca Express and Wingstop!

EXHIBITION

The Delvers Gem and Mineral Society will host an exhibition in the main lobby from Thursday, July 6 through Wednesday, August 30. The exhibition will include a variety of minerals and gems in their raw form, fossils and petrified wood found throughout the United States and worldwide. Club members will exhibit pieces from their personal collections and tools used in their craft. Delvers Gem and Mineral Society has existed for nearly 73 years and promotes the earth sciences and the preservation of paleontological specimens and lapidary arts.

Take preventative steps against mosquitoes

With the first West Nile virus positive mosquito sample confirmed this year in Los Angeles County in June, vector control experts stress the need for the public to take preventative steps against mosquitoes.

Mosquitoes can transmit diseases such as West Nile virus, which can cause debilitating illness and death to humans as well as birds, horses and other wildlife. Twenty percent of people infected with West Nile virus will exhibit flu-like symptoms, and one in 150 people infected will require hospitalization. There is currently no cure or vaccine for the virus.

The Greater Los Angeles Vector Control District (GLACVCD), a local government and public health agency dedicated to reducing populations of public health vectors and preventing human infection associated with mosquito-transmitted diseases, has issued the following tips to stay safe.

- Eliminate standing water around the home. It takes as little as five days for mosquito eggs to hatch into biting adults.
- Many children play sports or are outdoors from late afternoon to the evening hours, when mosquitoes are most active. Anyone outside during these hours should wear long-sleeved shirts and pants and use insect repellent containing DEET, Picaridin and oil of lemon eucalyptus.
- To help West Nile virus surveillance and control efforts, report dead birds at westnile.ca.gov.

For more information, call GLACVCD at (562) 944-9656 or visit glacvcd.org. ■

Cerritos Library seeks teen volunteers

The Cerritos Library Volunteer program is seeking responsible, dependable and enthusiastic teens to help with library programs, shelving and monitoring of computer workstations.

Applications for the 2023 Fall session will be available starting Monday, July 17. The session runs from Monday, September 11 through Saturday, December 16.

The program is open to students who will be at least 13 years old in Fall 2023. Applicants must have a Cerritos Library card in good standing and are required to pass a criminal background assessment in accordance with City policy. For more information, call (562) 916-1338 or email volunteer@cerritos.us. ■

City adopts hazard mitigation plan

The Cerritos City Council recently adopted an updated Hazard Mitigation Plan (HMP). Under the federal Disaster Management Act of 2000, a current HMP is mandatory for every local, county and state government agency in order to be eligible for disaster-related grants and funding. Agencies are expected to update the plan every five years.

The City's newly adopted plan addresses the following hazards: earthquake, urban fire, transportation accident/incident, adversarial events, flood/dam failure, windstorm, disease outbreak, pipeline failure/hazardous, material release and drought.

For a copy of the HMP, visit safecerritos.com/_pdfs/hazard_mitigation_plan.pdf. ■

Rabies clinic to be held in July

The City of Cerritos will hold a low-cost rabies clinic for dogs and cats in Shelter 1 at Cerritos Park East from 6 to 7:30 p.m. on Wednesday, July 12.

The clinic is sponsored by Long Beach Animal Care Services and Artesia Animal Hospital, in cooperation with the City of Cerritos' Community Safety and Community Participation divisions.

Rabies shots for dogs and cats will be available for \$17, and canine bordetella (kennel cough) shots cost \$20 each. Canine coronavirus vaccines are \$20, and Lyme disease vaccines will be \$26. DHPP shots, also known as the "6-in-1" vaccine that protects dogs from distemper, hepatitis, parainfluenza and parvovirus, will be available for \$21. The comparable "4-in-1" (FVR-CPP) shot for cats costs \$22. Feline bordetella (FIP) shots will be \$38, and feline coronavirus (FELV) shots are \$26. In addition to vaccination fees, a \$3 biohazard disposal fee will be charged for each treated animal.

Checks for vaccines should be made payable to the City of Cerritos. A driver's license number and expiration date are required on all checks. Returned checks are subject to a \$10 service fee.

In addition to an annual rabies shot, dogs four months and older are required by law to have a license. Dog licenses will be sold to Cerritos, Long Beach, Los Alamitos, Seal Beach and Signal Hill residents at the clinics. Dog license fees for Cerritos residents are \$20, or \$10 for dogs that are spayed or neutered (a certificate is required to receive the discount). Seniors ages 60 and older may purchase up to three half-price licenses per household for dogs that are spayed or neutered. Checks for dog licenses should be made payable to City of Long Beach.

Pet owners must keep their dogs on leashes and cats in pet carriers during the clinic. For more information about animal licenses, call Long Beach Animal Care Services at (562) 570-7387. ■

New Norm Reeves Genesis car dealership approved

The Cerritos City Council has approved a request for a new Norm Reeves Genesis auto dealership at 11011 South Street in Cerritos.

Norm Reeves Genesis of Cerritos, which currently operates a dealership in the Cerritos Auto Square at 10907 183rd Street, plans to relocate to the new site once the work is completed.

The site is north of South Street and east of Studebaker, bordered on the east by the San Gabriel Freeway (I-605).

The proposal entails demolishing the existing 8,970-square-foot building and constructing a new 13,238-square-foot auto dealership building.

The new building will feature Genesis corporate design guidelines and will modernize the look to match the updated building designs found in the Cerritos Auto Square. Plans call for glass panel walls,

with a Basalt Grey-colored, Alucobond metal panel band at the top of each building elevation.

A service reception canopy is proposed on the north side of the building, designed with three drive-through service bays, with each bay showcasing a glass panel roll-up door to complement the glass elements on the dealership building. The remaining portions of the building will be covered in stucco panels and painted grey to match the color scheme of the building.

The landscaping includes water-saving plant trees, shrubs, succulents and groundcover, including Western Redbud trees, Crape Myrtle trees, Queen Palm trees and London Plane trees. The proposal also incorporates a Zen garden showcasing bamboo plants, lily ponds and various ornamental landscape features. ■

Family Entertainment Showcase offers summer fun

The City's free Family Entertainment Showcase returns this summer, offering a variety of fun children's activities and concerts. For the enjoyment of all and pursuant to the Cerritos Municipal Ordinance 9.48.030(p), dogs, cats or pets are not allowed in the park during special events and concerts. Smoking, including electronic cigarettes, is prohibited within the boundaries of all City of Cerritos public park facilities pursuant to the Cerritos Municipal Ordinance 9.49.020.

Tuesday Family Nights

Entertainment and activities for the whole family will be offered every Tuesday at 6:30 p.m. at Friendship, Frontier, Sunshine and Westgate parks. Each program will last approximately 45 minutes and feature a pre-show craft or activity from 6 to 6:20 p.m. Arrive early and bring a blanket for seating. Please note that there are no restroom facilities at Friendship Park and Sunshine Park.

- July 11 California Joe Magic Show at Frontier Park
- July 18 Steel Parade at Sunshine Park

- July 25 Mad Science at Friendship Park
- August 1 Kids Reptile Parties at Westgate Park
- August 8 Luce Puppet Company at Frontier Park
- August 15 Michael the Juggler at Sunshine Park

Thursday Concerts Under the Stars

The Heritage Park Island Stage will be the hottest ticket in town this summer when exciting musical groups perform on Thursdays at 7 p.m. Bring a picnic dinner and a blanket and relax with family and friends. The shows are outdoors on the lawn, so bring a jacket. Snacks will be available for a nominal fee.

- July 13 Classic Journey (Journey Tribute)
- July 20 The Emperors (Classic Rock)
- July 27 33 Thunder (Country)
- August 3 Knight Ryder (80s)
- August 10 Sangre Nueva (Salsa/Latin)
- August 17 Let It Be (Beatles Tribute)

For more information about the Family Entertainment Showcase, call the City's Recreation Services Division at (562) 916-1254. ■

Keep pets safe this summer

The hot summer months can be uncomfortable and dangerous for pets. Here are some tips for keeping pets safe in the heat:

- Never leave pets in a parked car, even with the car running and air-conditioner on. Temperatures inside a vehicle can rise rapidly to dangerous levels. On an 85-degree day, the temperature inside a vehicle with the windows slightly cracked open can reach 102 degrees within 10 minutes. After 30 minutes, the temperature could reach 120 degrees. Such heat may cause death or irreversible organ damage in pets.
- Watch the humidity. Dogs pant to cool down, but high humidity prevents them from doing so, causing their body temperature to soar to dangerous levels quickly.
- Limit exercise on hot days. Walk dogs in the early morning or late at night. Pay special attention to pets with white-colored ears (as they are more susceptible to skin cancer) and short-nosed pets, which typically have difficulty breathing. Dogs absorb and release heat through their feet, therefore,

walk them on grass or use doggy boots. Bring water to keep pets from dehydrating.

- Don't rely on fans, which don't cool off animals as effectively as they do people. If you don't have air-conditioning, lay down a wet towel for your dog to lie on or simply set up a fan in front of a pan of ice.
- Provide clean water and protection from heat and the sun when dogs are outdoors. Add ice to water. A doghouse does not provide relief from heat. Tree shade and tarps are ideal because they don't obstruct air flow.
- Watch for signs of heatstroke, including heavy panting, glazed eyes, a rapid heartbeat, difficulty breathing, excessive thirst, lethargy, fever, dizziness, lack of coordination, profuse salivation, vomiting, a deep red or purple tongue, seizure and unconsciousness. If a dog is suffering from heatstroke, move it into the shade or an air-conditioned area. Apply ice packs or cold towels to its head, neck and chest or run cool (not cold) water over the pet. Give it small amounts of cool water or ice cubes to lick. Take the dog to the veterinarian. ■

Business Spotlight

OEC Group

OEC Group was recently selected for the City's Business Spotlight Program, which showcases companies that foster pride in the community, provide jobs and contribute to the local economy.

Founded in 1981, the Taiwan-based firm offers a wide range of freight transportation and logistics services, including air and ocean transportation, customs brokerage, warehousing and distribution, and supply-chain management. OEC's southwest region division opened its headquarters in Cerritos in 2006.

The company, which now has a presence in more than 50 countries worldwide, won the prestigious "Best Logistics Service Provider" award from the Taiwan External Trade Development Council. OEC actively participates in a range of programs that support environmental sustainability, social welfare and community development.

Located at 13100 Alondra Boulevard, Suite 100, OEC Group can be reached at (562) 926-7186 and oecgroup.com.

Cerritos Water Quality Report available

The City's Annual Consumer Confidence (Water Quality) Report is available on the City's website at cerritos.us/ccr2022.pdf. The report indicates that Cerritos water meets all primary state and federal standards.

State and federal laws require printed or electronic distribution of the water-quality information to everyone served by the City's water utility. The report describes the City's stringent water tests, which are conducted more frequently than required by the State Health Department. The Consumer Confidence Report provides detailed test results and explains the City's water supply, which flows to customers through a system of wells, reservoirs, mains and pipes.

For more information about the Water Quality Report, call (562) 407-2674. ■

Stay vigilant during warm summer months

During the warm summer months, many residents leave their doors and windows opened or unlocked in an effort to keep their homes cool. Most residential burglaries in Cerritos are directly attributed to doors and windows being left opened. Burglars will most often use the easiest point of entry possible to get inside a residence.

It is safer to cool your home by opening doors and windows upon your return, rather than leaving them opened and increasing your risk of becoming a victim.

When the weather is warm, garage doors are also often left opened and unattended as homeowners try to ventilate the space. Cerritos Sheriff's deputies point out that a significant percentage of residential burglaries occur as a result of open garages.

Leaving a garage door open provides burglars an opportunity to inventory belongings for future reference or gain access to your home. Burglars are capable of stealing property in a very short amount of time. Passersby or vehicle occupants can quickly obtain bicycles, lawn care products, tools and other items in a matter of seconds.

Open garage doors also provide burglars the opportunity to enter a garage and close the door to conceal themselves while they try to pry open the inner door into the home.
