Wilderness Park is accident waiting to happen

Dear editor:

“One dead, another paralyzed — bicycle collides with hiker in Claremont Wilderness Park”

I predict the Courier will be running that headline sometime in the next 10 years if the rules aren’t changed.

The Claremont Hills Wilderness Park has topography that makes for a particularly dangerous interaction between hikers and bicycles (let alone horses!).

When an accident happens, it will largely be attributable to just one factor: a bicyclist racing downhill around a blind turn without ringing their bell, who then

encounters a group of hikers coming uphill. Maybe it will be one group of hikers attempting to pass another on the left.

No matter which side of the road they are on, groups of hikers who encounter each other will never collide. The problem is bicycles traveling at excessive speed combined with steep grades and curves with limited visibility. The rangers in their trucks are aware of this problem. They sound their horn gently at every blind turn.

The City of Claremont is also aware of this problem. It has erected new signage, sent out flyers to every household in the city detailing proper trail etiquette, made warning bells available at the park entrance and threatened to eject visitors who don’t

obey the rules.

Despite these admonitions, some bicyclists continue to race downhill, around blind corners, without using a bell. It happened to me yesterday while walking in the park.

Having acknowledged the obvious potential for catastrophe, the city will bear considerable legal liability when the inevitable accident occurs.

Adding electric bicycles to the mix is the last straw!

ICE raids terrorize, but also create opportunity

Dear editor:

I just read in the Los Angeles Times Sunday edition how ICE is raiding car washes in LA County in order to round up immigrants (you know, the gangsters, rapists and drug dealers who love to work in the blazing sun outdoors), and that some car washes have been forced to close down for lack of help. But I was quick to take action. This writer has had a long-term dream of working in that industry, second only to working in the fields picking crops in John Steinbeck country, Salinas. So the time was ripe to apply at a local car wash. When the owner told me he had a full time job for a person to dry and detail washed cars, I jumped at the opportunity. He asked what my expectations were, and I humbly told him, “At least \$100,000 a year, no weekends, two days’ work at home, and a well-funded 401(k).” I feel everything went extremely well and that I’ll get a job offer very soon. If, sadly, that opportunity doesn’t pan out, I’ll drive up to Salinas and give that a shot.

We are in an abusive relationship with our government

Dear editor:

Intimidation, emotional abuse, isolation, minimizing, denying and blaming, using children, male privilege, economic abuse, coercion and threats are all indicators of an abusive relationship. The indicators were named in the early 1980s and are just as relevant today. These indicators form the framework in our country’s efforts to reduce the incidents of domestic violence, both for the aggressor and for the recipient of the behaviors.

I bring this to light today because I have seen these same indicators in the way our current government officials are treating its citizens. I don’t think it takes a great deal of imagination to draw parallels of these indicators to the current climate in this country. I am confident that many readers have experienced this personally at some point in their life or know of someone who was traumatized.

What I have learned over the past 32 years investigating these crimes is the “public display” of violence had its roots set anywhere from three to five years in what I refer to as “private/hidden” abuse. The abuser gains enough confidence after years of practice to finally go public with their behavior. Think of it has the tip of an iceberg. It is what’s below the surface that is often overlooked or excused.

Ultimately, it is the victim’s choice on whether to leave (divorce) the violent relationship or wait until a lethal event occurs. The remedy is simple: Elect officials who abhor violence as the primary means of social control and break the cycle.
