

**Foothill Municipal Water District(FMWD)  
2023 WATER QUALITY REPORT TO FMWD MEMBER AGENCIES**

**WEYMOUTH** refers to the Metropolitan Water District's Weymouth Water Treatment Plant in the city of La Verne.  
**FM-1** refers to the FMWD-Metropolitan Water District connection in the city of Pasadena.

**DEFINITION OF TERMS AND FOOTNOTES**

**Footnotes**

- (a) FMWD receives 100% of water from the Metropolitan Water District of Southern California's Weymouth Treatment Plant.
- (b) Per the State's Surface Water Treatment Rule, treatment techniques that remove or inactivate *Giardia* cysts will also remove HPC bacteria, *Legionella*, and viruses. *Legionella* and virus monitoring is not required.
- (c) Compliance is based on monthly samples from treatment plant effluents and the distribution system.
- (d) The MCL for *E. coli* is based on any of the following conditions: Coliform-positive routine and repeat samples with either of them positive for *E. coli*; failure to analyze a repeat sample following an *E. coli*-positive routine sample; or a coliform-positive repeat sample is not tested for the presence of *E. coli*.
- (e) All distribution system samples had detectable total chlorine residuals, so no HPC analysis was required. Metropolitan monitors HPC bacteria to ensure treatment process efficacy.
- (m) Compliance with the State and Federal MCLs is based on RAA or LRAA, as appropriate. Plant core locations for TTHM and HAA5 are service connections specific to each of the treatment plant effluents.
