

APPENDIX F: Certification Form (Suggested Format)

Consumer Confidence Report Certification Form

(to be submitted with a copy of the CCR)

(To certify electronic delivery of the CCR, use the certification form on the State Water Board's website at

http://www.swrcb.ca.gov/drinking_water/certlic/drinkingwater/CCR.shtml)

Water System Name:	Carnelian Woods
Water System Number:	CA31-10023

The water system named above hereby certifies that its Consumer Confidence Report was distributed on 6/27/25 (date) to customers (and appropriate notices of availability have been given). Further, the system certifies that the information contained in the report is correct and consistent with the compliance monitoring data previously submitted to the State Water Resources Control Board, Division of Drinking Water.

Certified by:	Name:	Raquel Moore	
	Signature:		
	Title:	Lead Water Quality Tech	
	Phone Number:	(530)546-4212	Date: 7/30/25

To summarize report delivery used and good-faith efforts taken, please complete the below by checking all items that apply and fill-in where appropriate:

- CCR was distributed by mail or other direct delivery methods. Specify other direct delivery methods used: Post Cards to Postal Patrons & Customers
- "Good faith" efforts were used to reach non-bill paying consumers. Those efforts included the following methods:
 - Posting the CCR on the Internet at www.https://ntpud.org/public-utilities/water/quality/
 - Mailing the CCR to postal patrons within the service area (attach zip codes used)
 - Advertising the availability of the CCR in news media (attach copy of press release)
 - Publication of the CCR in a local newspaper of general circulation (attach a copy of the published notice, including name of newspaper and date published)
 - Posted the CCR in public places (attach a list of locations)
 - Delivery of multiple copies of CCR to single-billed addresses serving several persons, such as apartments, businesses, and schools
 - Delivery to community organizations (attach a list of organizations)

- Other (attach a list of other methods used)
- For systems serving at least 100,000 persons: Posted CCR on a publicly-accessible internet site at the following address: www. _____
- For investor-owned utilities: Delivered the CCR to the California Public Utilities Commission

This form is provided as a convenience for use to meet the certification requirement of the California Code of Regulations, section 64483(c).

NTPUD Water Conservation Regulations

Water only on Designated Days:

- EVEN addresses: Mon, Wed, Fri
- ODD addresses: Sun, Tue, Thu
- NO watering on Saturday

Water only at Designated Times:

- NO watering between 9am - 6pm
- NO watering within 48 hours after measurable precipitation
- NO watering if the temperature is less than 40°F

MAKE WATER CONSERVATION THE CALIFORNIA WAY OF LIFE

AVOID the following wasteful activities:

- Outdoor irrigation that causes run off onto sidewalks and streets
- Hosing off hard surfaces for any reason other than pavement resurfacing/sealing and public health/safety
- Automatic shutoff nozzles or valves are required on all hoses

Water conservation information available online at ntpud.org/conservation

2024 NTPUD Drinking Water Report now available online.

- See back for details -

2024 Drinking Water Report

Now available at www.ntpud.org/waterquality

Each year, the North Tahoe Public Utility District provides its customers with a **Drinking Water Quality Report** to let you know how well our water quality stacks up to established Federal and State drinking water standards. We encourage you to review this report as it provides details about the source and quality of the drinking water delivered in 2024.

The report is available at www.ntpud.org/waterquality. If you wish to have a paper copy, you can print directly from the web page or contact the District at savewater@ntpud.org or (530) 546-4212.

Este informe contiene información muy importante sobre la calidad de su agua potable. Por favor lea este informe o comuníquese con alguien que pueda traducir la información.

ATTENTION: Landlords, Businesses, Schools, and Community Groups

Please share this drinking water information with tenants, students, and other water users at your location who may not be North Tahoe Public Utility District water customers.

Three easy and convenient ways to save time AND the environment:

1. Electronic invoice Delivery

If you would like the convenience of receiving your advertising invoices electronically, please email advertisingbilling@swiftcom.com with your account number, email address, contact name and phone number. Alternatively, you may call (888) 508-2666 to request this option; notify your Account Manager; or include with your payment the completed portion on the reverse of the remittance coupon above. Please note that by requesting to receive your advertising billing documents electronically, all future mailings of the physical paper document will discontinue. If at any time you wish to change the method of billing document delivery, please email advertisingbilling@swiftcom.com or call (888) 508-2666.

2. Electronic TearSheets

Electronic tearsheets, or E-Sheets, allow for a quick delivery of your newspaper tearsheets on a real time basis in a convenient and environmentally friendly manner. With E-Sheets you can quickly verify the page and frequency of publication of your scheduled ads. To utilize this feature, all you need is your account number. Your account number can be found in the upper right hand corner of your monthly invoice. Simply visit the following URL and use the login information below, changing the italicized portions to your personal information.

URL: <http://ts.merlinone.com/>
Username: *youraccountnumber_SWT*
Password: *youraccountnumber*

When you log in, you will be able to view your tearsheets in a variety of formats. We also offer an electronic tearsheet tutorial and an option to receive your tearsheets directly to your e-mail inbox on the date of publication of your ad. To access these features, click on the "E-Sheets" tab on the top menu bar. From there you may update your contact information, provide your e-mail address and learn how to customize your electronic tearsheet experience. If you have questions about E-Sheets please contact your Account Manager or call (888) 508-2666.

3. Auto Payment

Our Auto Payment Plan is a convenient way to pay your advertising invoices on time. With this plan, you will continue to receive your advertising statement; however, your advertising balance will automatically be charged to your credit card on the first day of the month. Should your selected date fall on a weekend or holiday, your balance will be charged on the following business date. It is that simple!

If you would like to participate in the Auto Payment Plan, please complete the credit card section on the reverse of the remittance coupon above and return the signed agreement to PO Box 1500, Gypsum, CO 81637 Attn: Accounts Receivable. Should you have any questions, please feel free to contact our Accounts Receivable department at (888) 508-2666.

Making Payments

To ensure your payment is credited accurately to your account(s) please:

- Include the remittance coupon(s) with your payment
- Write your account number on your check
- Indicate other accounts to which payment should be applied if paying more than one account

Disputes

If you believe your bill to be in error or you need more information, contact your Account Manager as soon as possible or call (888) 508-2666. You will not be required to pay the amount in question while we are researching it, but you are still obligated to pay the portion of your bill that is not in question.

Return Payment and Collection Fees

We reserve the right to assess fees related to returned payments and/or collection of balances due.

Finance Charges

Your account balance is due upon the date or terms listed on the front of this notice. A grace period may be granted up to the last business date of the month the balance is due. A finance charge will be assessed at the rate of 1.5% (18% annual) on balances which remain unpaid at the end of the billing period. Finance charges continue to accrue until the unpaid balance is paid in full. We reserve the right not to assess any or all finance charges for any given billing period.

NORTH TAHOE PUBLIC UTILITY DISTRICT 2024 Drinking Water Report

The State allows us to monitor contaminants less than once per year because the concentrations of these contaminants do not change frequently. Some of our data, though representative, are more than one year old. If a substance or contaminant is not listed, it is either not detected above the detection limit in our sources or not required to be reported or sampled. A list of MCL's, DLR's, and PHG's may be found via the link labeled "MCLs, DLRs, and PHGs - (PDF)" on the State Water Board website, which is available at https://www.waterboards.ca.gov/drinking_water/certlic/drinkingwater/MCLsandPHGs.html

Lead
Lead can cause serious health effects in people of all ages, especially pregnant people, infants (both formula-fed and breastfed), and young children. Lead in drinking water is primarily from materials and parts used in service lines and in home plumbing. NorthTahoe PUD is responsible for providing high quality drinking water and removing lead pipes but cannot control the variety of materials used in the plumbing in your home. Because lead levels may vary over time, lead exposure is possible even when your tap sampling results do not detect lead at one point in time. You can help protect yourself and your family by identifying and removing lead materials within your home plumbing and taking steps to reduce your family's risk. Using a filter, certified by an American National Standards Institute accredited certifier to reduce lead, is effective in reducing lead exposures. Follow the instructions provided with the filter to ensure the filter is used properly. Use only cold water for drinking, cooking, and making baby formula. Boiling water does not remove lead from water. Before using tap water for drinking, cooking, or making baby formula, flush your pipes for several minutes. You can do this by running your tap, taking a shower, doing laundry or a load of dishes. If you have a lead service line or galvanized requiring replacement service line, you may need to flush your pipes for a longer period. If you are concerned about lead in your water and wish to have your water tested, contact North Tahoe PUD at (530) 546-4212. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available at <https://www.epa.gov/safewater/lead>.

*: Lead and copper samples are gathered by North Tahoe Public Utility District personnel from customer volunteers living in the Dollar Hill Water System.
*: Consistent with the U.S. EPA Lead and Copper Rule Revisions (LCRR), North Tahoe PUD has conducted a service line inventory. If you would like information regarding the material of your service line, please visit our office at 875 National Ave. Tahoe Vista CA or call us at (530)546-4212

Radon
Radon is a radioactive gas that you cannot see, taste or smell. It is found throughout the U.S. Radon can move up through the ground and into a home through cracks and holes in the foundation. Radon can build up to high levels in all types of homes. Radon can also get into indoor air when released from tap water from showering, washing dishes and other household activities. Compared to radon entering the home through soil, radon entering the home through tap water on most cases would be a small source of radon in indoor air. Radon is a known human carcinogen. Breathing air containing radon can cause cancer. Drinking water containing radon may also cause an increased risk of stomach cancer. If you are concerned about radon in your home, test the air in your home. Testing is inexpensive and easy. You should pursue radon removal for your home if the level of radon in your air is four (4) picocuries per liter of air (pCi/L) or higher. There are simple ways to fix a radon problem that are not too costly. For additional information, call your State radon program (1-800-745-7236), the USEPA Safe Drinking Water Hotline (1-800-426-4791), or the National Safety Council on Radon Hotline (1-800-767-7236).

Gross Alpha
Certain minerals are radioactive and may emit a form of radiation. Some people who drink water containing alpha emitters in excess of the MCL over many years may have an increased risk of getting cancer.

Uranium
Some people who drink water containing uranium in excess of the MCL over many years may have kidney problems or an increased risk of getting cancer.

Arsenic
While your drinking water meets the federal and state standard for arsenic, it does contain low levels of arsenic. The arsenic standard balances the current understanding of arsenic's possible health effects against the costs of removing arsenic from drinking water. The U.S. Environmental Protection Agency continues to research the health effects of low levels of arsenic, which is a mineral known to cause cancer in humans at high concentrations and is linked to other health effects such as skin damage and circulatory problems.

Conservation – A California Way of Life
As of May 13, 2020 the District's Stage 2 water conservation measures will remain in effect.

- Current Reduction Measures**
- Water only on designated days: (Stage 2 Highlights)**
 - EVEN** addresses: Monday, Wednesday, Friday
 - ODD** addresses: Sunday, Tuesday, Thursday
 - NO** watering on Saturday
 - Water only on designated times: (Stage 1 Highlights)**
 - No** watering between the hours of 9am – 6pm
 - No** watering within 48 hours after, measurable precipitation
 - No** watering if the air temperature is less than 40 degrees Fahrenheit
- The following wasteful water practices are now permanently prohibited:**
- Irrigation that causes run off onto sidewalks or streets
 - Hosing off hard surfaces (i.e., asphalt driveways), except for pavement resurfacing/sealing or public health/safety reasons
 - Automatic shut off valves or nozzles are required on ALL hoses
- For most recent info go to ntpud.org/public-utilities/water/regulations/.

To Our Customers: This report contains important information about your drinking water.

Este informe contiene información muy importante sobre la calidad de su agua potable. Por favor lea este informe o comuníquese con alguien que pueda traducir la información.

Where does my water come from?

The North Tahoe Public Utility District services 3,976 connections. These connections include single family dwellings and business establishments, as well as separate irrigation and fire systems. The District operates three separate and independent water systems: Dollar Cove, Carnelian Bay, and the Tahoe Main system, comprised of Tahoe Vista, Kings Beach, and Brockway to the Nevada State Line. Dollar Cove is currently being supplied through the Tahoe City Public Utility District's Tahoe City system, by agreement of a joint well drilling project of the two Districts that is comprised of five separate wells (groundwater sources). Carnelian Bay draws its water from a single well (groundwater source). The Tahoe main water system draws water from Lake Tahoe (surface water source) through an intake at the end of National Avenue in Tahoe Vista, as well as a single well (groundwater source) located in the North Tahoe Regional Park at the top of Donner Road. These combined sources supplied just under 329.5 million gallons of water to our customers in 2023.

How can I keep our drinking water safe and clean?

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity. Contaminants that may be present in source water includes:

- Microbial contaminants, such as viruses and bacteria, that may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
- Inorganic contaminants, such as salts and metals, that can be naturally-occurring or result from urban stormwater runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.
- Pesticides and herbicides, that may come from a variety of sources such as agriculture, urban stormwater runoff, and residential uses.
- Organic chemical contaminants, including synthetic and volatile organic chemicals, that are byproducts of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, agricultural application, and septic systems.

Radioactive contaminants, that can be naturally-occurring or be the result of oil and gas production and mining activities.

In order to ensure that tap water is safe to drink, the U.S. Environmental Protection Agency (U.S. EPA) and the State Water Resources Control Board (State Water Board) prescribe regulations that limit the amount of certain contaminants in water provided by public water systems. U.S Food and Drug Administration regulations and California law also establish limits for contaminants in bottled water that provide the same protection for public health.

Why are there contaminants in my drinking water?

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the U.S. EPA's Safe Drinking Water Hotline (1-800-426-4791). Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. U.S. EPA/Centers for Disease Control (CDC) guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbial contaminants are available from the Safe Drinking Water Hotline (1-800-426-4791).

Source water assessment and its availability

Our most recent watershed sanitary survey (North Lake Tahoe) update is 2022. Although the North Tahoe Basin sewage flows to Truckee and is treated, domestic sewage and wastewater disposal and collection are Potentially Contaminating Activities (PCA) of key concern. Summer recreation on the lake is another PCA of key concern. The District does not have direct regulatory control or enforcement over the Lake Tahoe watershed. We rely on the regulatory powers of the Tahoe Regional Planning Agency (TRPA) and Lahontan Regional Water Quality Control Board (RWQCB).

Water Quality Data

These system table lists a portion the drinking water contaminants that were tested for during the 2023 calendar year. The presence of these contaminants in the water does not necessarily indicate that the water poses a health risk. Unless otherwise noted, the data presented in this table is from testing done January 1—December 31, 2023. The EPA or the State requires us to monitor for certain contaminants less than once per year because the concentrations of these contaminants do not change frequently. See the last page for Terms and Abbreviations used in the report. This full report is available on our website at ntpud.org/public-utilities/water/quality/.

For Your Information

Our Board of Directors meets on the second Tuesday of each month at the North Tahoe Event Center. We encourage participation in these meetings. For meeting times and agendas please contact the District's main office, (530) 546-4212, or visit our website ntpud.org.

To obtain specific water quality or watershed data contact the Water Quality Department (530) 546-4212, or savewater@ntpud.org.

<u>Acronyms and Abbreviations</u>	<u>Parts Per Million (PPM):</u> ,parts contaminant for every 1 million parts of water.
<u>Maximum Contaminant Level (MCL):</u> The highest level of a contaminant that is allowed in drinking water. Primary MCLs are set as close to the PHGs (or MCLGs) as is economically and technologically feasible. Secondary MCLs are set to protect the odor, taste, and appearance of drinking water.	<u>TON:</u> Threshold Odor Number
<u>Maximum Contaminant Level Goal (MCLG):</u> The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.	<u>T:</u> Number of tests for bacteria (Laboratory analysis)
<u>Public Health Goal (PHG):</u> The level of a contaminant in drinking water below which there is no known or expected risk to health. PHGs are set by the California Environmental Protection Agency.	<u>A:</u> Number of tests absent of bacteria
<u>Primary Drinking Water Standard (PDWS):</u> MCLs, MRDLs and treatment techniques (TTs) for contaminants that affect health, along with their monitoring and reporting requirements.	<u>P:</u> Number of tests detecting presence of bacteria
<u>Maximum Residual Disinfectant Level (MRDL):</u> The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.	<: Less Than
<u>Maximum Residual Disinfection Level Goal (MRDLG):</u> The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.	>: Greater Than
<u>Regulatory Action Level (AL):</u> The concentration of a contaminant which, if exceeded, triggers treatment or other requirements that a water system must follow.	<u>RAA:</u> Running Annual Average
<u>Treatment Technique (TT):</u> A required process intended to reduce the level of a contaminant in drinking water.	<u>AN:</u> Annual
<u>Parts Per Billion (PPB):</u> parts contaminant for every 1 billion parts of water.	<u>NA:</u> Not Applicable
	<u>ND:</u> Not Detected, indicates contaminant was not detected in the water source.
	<u>N/R:</u> Not Regulated or Not Required
	<u>ug/L:</u> Micro grams Per Liter (Parts Per Million)
	<u>pCi/L:</u> Picocuries Per Liter: Measures of radioactivity per 1 light scattering.
	<u>Units:</u> Number of units measured
	<u>uS:</u> Microsiemens are the measure of electrical current through a solution.
	<u>Turbidity:</u> is a measure of the cloudiness of the water. We monitor it because it is a good indicator of water quality. High turbidity can hinder the effectiveness of disinfectants.
	<u>NTU:</u> Nephelometric Turbidity Unit.
