

APPENDIX B: eCCR Certification Form (Suggested Format)

Consumer Confidence Report Certification Form

(To be submitted with a copy of the CCR)

Water System Name:	Rancho California Water District
Water System Number:	CA3310038

The water system named above hereby certifies that its Consumer Confidence Report was distributed on 6-9-2026 (date) to customers (and appropriate notices of availability have been given). Further, the system certifies that the information contained in the report is correct and consistent with the compliance monitoring data previously submitted to the State Water Resources Control Board, Division of Drinking Water (DDW).

Certified by:

Name: Joe Perreira	Title: Water Operations Supervisor
Signature: 	Date: 6-24-2026
Phone number: 951 296-6978	blank

To summarize report delivery used and good-faith efforts taken, please complete this page by checking all items that apply and fill-in where appropriate:

- ☐ CCR was distributed by mail or other direct delivery methods (attach description of other direct delivery methods used).
- ☒ CCR was distributed using electronic delivery methods described in the Guidance for Electronic Delivery of the Consumer Confidence Report (water systems utilizing electronic delivery methods must complete the second page).
- ☒ "Good faith" efforts were used to reach non-bill paying consumers. Those efforts included the following methods:
 - ☒ Posting the CCR at the following URL: www.ranchowater.com
 - ☐ Mailing the CCR to postal patrons within the service area (attach zip codes used)
 - ☐ Advertising the availability of the CCR in news media (attach copy of press release)
 - ☐ Publication of the CCR in a local newspaper of general circulation (attach a copy of the published notice, including name of newspaper and date published)
 - ☐ Posted the CCR in public places (attach a list of locations)

- ☒ Delivery of multiple copies of CCR to single-billed addresses serving several persons, such as apartments, businesses, and schools
- ☐ Delivery to community organizations (attach a list of organizations)
- ☐ Publication of the CCR in the electronic city newsletter or electronic community newsletter or listserv (attach a copy of the article or notice)
- ☒ Electronic announcement of CCR availability via social media outlets (attach list of social media outlets utilized)
- ☐ Other (attach a list of other methods used)
- ☒ *For systems serving at least 100,000 persons:* Posted CCR on a publicly-accessible internet site at the following URL: www.ranchowater.com/CCR_____
- ☐ *For privately-owned utilities:* Delivered the CCR to the California Public Utilities Commission

Consumer Confidence Report Electronic Delivery Certification

Water systems utilizing electronic distribution methods for CCR delivery must complete this page by checking all items that apply and fill-in where appropriate.

- ☒ Water system mailed a notification that the CCR is available and provides a direct URL to the CCR on a publicly available website where it can be viewed (attach a copy of the mailed CCR notification). URL: www._Ranchowater.com/CCR_____
- ☒ Water system emailed a notification that the CCR is available and provides a direct URL to the CCR on a publicly available site on the Internet where it can be viewed (attach a copy of the emailed CCR notification). URL: www.__Ranchowater.com/CCR_____
- ☐ Water system emailed the CCR as an electronic file email attachment.
- ☐ Water system emailed the CCR text and tables inserted or embedded into the body of an email, not as an attachment (attach a copy of the emailed CCR).
- ☐ *Requires prior DDW review and approval.* Water system utilized other electronic delivery method that meets the direct delivery requirement.

Provide a brief description of the water system's electronic delivery procedures and include how the water system ensures delivery to customers unable to receive electronic delivery.

**Rancho Water**

WORKING FOR OUR COMMUNITY

Rancho California Water District Water Quality

Rancho California Water District's water comes from a variety of natural sources. Our natural sources include precipitation, untreated import water recharge basins, and regional groundwater (aquifers). Rancho Water also purchases treated water from [Metropolitan Water District of Southern California](#). This agency imports water from Northern California and the Colorado River.

Water Demands

The Rancho Water-managed groundwater basins are estimated to hold over 2 million acre-feet of water. The annual safe yield of these basins is approximately 30,000 acre-feet per year, which meets nearly half of the District's needs. An acre-foot equals about 326,000 gallons, or enough water to cover an acre of land about the size of a football field, one foot deep. An average California household uses between one-half and one acre-foot of water per year for indoor and outdoor use. Surface water from Vail Lake and Lake Skinner is used to help replenish our groundwater supplies through recharge operations.

All aquifers managed by Rancho Water are located in the Santa Margarita Watershed. Oversight of all groundwater production within the Santa Margarita Watershed falls under the continuing jurisdiction of the United States District Court, San Diego and is administered under the auspices of a court-appointed water master (the "Santa Margarita Water Master"). Most of the remaining water demands are met with imported water purchased from Metropolitan Water District of Southern California.

Ensuring Quality

To ensure the highest quality of water is supplied to our customers, the District's water quality staff collects routine samples at several locations throughout the service area. While taking samples, staff monitors chlorine, temperature, pH, and other physical characteristics of the water to verify proper levels. These samples are taken to a laboratory and analyzed for water quality compliance and routine monitoring requirements.

Consumer Confidence Report

Rancho California Water District (Rancho Water/District) is committed to providing you with a clean, safe, and reliable water supply. It's the top priority of every employee of the District, and we're proud to say that those efforts make a difference. Based on the water quality monitoring data collected in 2024, the District's tap water met and exceeded all state and federal drinking water standards.

The U.S. Environmental Protection Agency (EPA) and the State Water Resources Control Board's Division of Drinking Water mandate all water agencies to produce an annual document informing customers about their drinking water supply for the previous year. This annual Consumer Confidence Report (CCR) contains information about Rancho Water's water supply and how it meets regulatory drinking water standards.

The annual Water Quality Reports below offer more detailed information about the quality of your drinking water. If you would like the hard copy of the most recent report mailed to you or an electronic copy of an older report, please send us an [email](#).

2025 Consumer Confidence Report Reflects High-Quality Tap Water Standards

Providing safe, dependable drinking water is at the heart of Rancho Water's mission, and it guides the work we do every day. In 2025, we continued our strong commitment to water quality protection through rigorous monitoring, advanced treatment practices, and system maintenance. We are proud to share that drinking water samples collected throughout 2025 met or surpassed all state and federal drinking water standards.

"We remain committed to delivering water our customers can trust and to building a resilient water future[...]"

- Jason Martin
Rancho Water General Manager

The annual Consumer Confidence Report (CCR) is prepared in accordance with requirements from the U.S. Environmental Protection Agency (EPA) and the State Water Resources Control Board (State Water Board). Its purpose is to provide customers with transparent, easy-to-understand

information about the quality of their tap water and the systems that deliver it.

The District's General Manager, Jason Martin, reflects on the information found in the CCR stating, "Rancho Water conducts more than 2,000 tests annually, with all samples analyzed by independent, certified laboratories to ensure accuracy and transparency."

Over the past year, Rancho Water has advanced a number of projects to store and deliver high-quality water to customers including well upgrades and construction, a systemwide pump station, and groundwater banking for drought preparedness.

Rancho Water remains committed to delivering water our customers can trust and to building a resilient water future for Temecula, Murrieta, and the surrounding communities we serve.

To view the Consumer Confidence Report or learn more about Rancho Water programs and projects, please visit RanchoWater.com/CCR.

Talent on Display

Rancho Water has been honored to receive awards for accomplishments in finance and communications. Each recognition reflects the consistent effort, innovation, and talent of the District team.

For the 31st consecutive year, our Finance department has been awarded the Government Finance Officers Association (GFOA) Achievement for Excellence in Financial Reporting for significant achievement in governmental accounting.

And, once again, the Public Affairs department has received Telly Awards and Communicator Awards for excellence in film and television production. This year's win is for the Rancho Water 60th Anniversary campaign winning an Award

of Excellence for Public Service Commercials, an Award of Distinction for Commercials-Local or Regional and a Silver Telly for Art Direction.

Valle de Los Caballos Recharge and Recovery Expansion Program

PROJECT UPDATES

Small, In-line Hydroelectric Facility

- ◇ Currently constructing the building that will house an in-line hydroelectric generator

In-line Hydroelectric Generator:

- ◇ Captures energy from water flow in existing pipeline
- ◇ Generates electricity during recharge
- ◇ Offsets a significant portion of energy costs

For more information about projects at Valle de Los Caballos, visit RanchoWater.com/VDCproject

PROGRAM BENEFITS

- ◇ Expand groundwater recharge and recovery to reduce reliance on costly imported water
- ◇ Enhance infrastructure with renewable energy to lower operational costs
- ◇ Improve drought resiliency for our community
- ◇ Enhance water supply reliability for customers
