

## Consumer Confidence Report Certification Form

(To be submitted with a copy of the CCR)

Water System Name:	Fort Irwin Water System
Water System Number:	CA3610705

The water system named above hereby certifies that its Consumer Confidence Report was distributed on 1 July 2024 to customers (and appropriate notices of availability have been given). Further, the system certifies that the information contained in the report is correct and consistent with the compliance monitoring data previously submitted to the State Water Resources Control Board, Division of Drinking Water (DDW).

Certified by:

Name: Sureya Valenzuela	Title: Water Resources Manager
Signature:	Date: 16 July 2024
Phone number: 760-380-3749	blank

*To summarize report delivery used and good-faith efforts taken, please complete this page by checking all items that apply and fill-in where appropriate:*

- CCR was distributed by mail or other direct delivery methods (attach description of other direct delivery methods used).
- CCR was distributed using electronic delivery methods described in the Guidance for Electronic Delivery of the Consumer Confidence Report (water systems utilizing electronic delivery methods must complete the second page).
- "Good faith" efforts were used to reach non-bill paying consumers. Those efforts included the following methods:
  - Posting the CCR at the following URL:  
<https://home.army.mil/irwin/my-fort/all-services/environmental/compliance/water-qualitywastewater>
  - Mailing the CCR to postal patrons within the service area (attach zip codes used)
  - Advertising the availability of the CCR in news media (attach copy of press release)
  - Publication of the CCR in a local newspaper of general circulation (attach a copy of the published notice, including name of newspaper and date published)
  - Posted the CCR in public places (attach a list of locations)
  - Delivery of multiple copies of CCR to single-billed addresses serving several persons, such as apartments, businesses, and schools
  - Delivery to community organizations (attach a list of organizations)

- Publication of the CCR in the electronic city newsletter or electronic community newsletter or listserv (attach a copy of the article or notice)
- Electronic announcement of CCR availability via social media outlets

- Other (attach a list of other methods used)
- For systems serving at least 100,000 persons: Posted CCR on a publicly-accessible internet site at the following URL: www.\_\_\_\_\_
- For privately-owned utilities: Delivered the CCR to the California Public Utilities Commission

### **Consumer Confidence Report Electronic Delivery Certification**

*Water systems utilizing electronic distribution methods for CCR delivery must complete this page by checking all items that apply and fill-in where appropriate.*

- Water system mailed a notification that the CCR is available and provides a direct URL to the CCR on a publicly available website where it can be viewed (attach a copy of the mailed CCR notification). URL: www.\_\_\_\_\_
- Water system emailed a notification that the CCR is available and provides a direct URL to the CCR on a publicly available site on the Internet where it can be viewed (attach a copy of the emailed CCR notification).
- Water system emailed the CCR as an electronic file email attachment.
- Water system emailed the CCR text and tables inserted or embedded into the body of an email, not as an attachment (attach a copy of the emailed CCR).
- Requires prior DDW review and approval. Water system utilized other electronic delivery method that meets the direct delivery requirement.

*Provide a brief description of the water system's electronic delivery procedures and include how the water system ensures delivery to customers unable to receive electronic delivery.*

Links were posted to Army Fort Irwin website, housing department, Postmasters, and social media (Facebook). Customers that are unable to receive electronic delivery can come by Building 602, Fifth St. or by calling 760-380-3749.

*This form meets the certification requirement of section 64483(c) of the California Code of Regulations.*

### Year 2023 Water Quality Report

Fort Irwin routinely monitors for constituents in the drinking water according to Federal and State laws. Fort Irwin would like to present to you a summary of last year's sampling results. This document also explains the results and provides contact information. If you have questions concerning this report contact: Fort Irwin, DPW Environmental Division, Water Manager: 760-380-3749.

**It is important to Fort Irwin that the customers be informed about water quality on the Installation.**

**MUY IMPORTANTE**

**Este informe contiene informacion muy importante sobre su agua potable. Traduzcalo o hable con alguien que lo entienda bien.**

**Water Quality Monitoring**

It is important to keep customers informed about the water quality and services delivered over the past year. Fort Irwin's goal is to provide a safe and dependable supply of drinking water. Fort Irwin completed construction of a new water treatment plant, Irwin Water Works (IWW), in 2016. All water provided at Fort Irwin is treated at IWW and is fully potable.

This report covers the requirement for a Consumer Confidence Report (CCR). Last year, we conducted more than 10,000 tests for 96 different contaminants. This report covers monitoring from 1 January 2023 through 31 December 2023.

**Should Customers be Concerned?**

Microbial contaminants are not a significant concern in Fort Irwin's water. Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons, such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants may be particularly at risk of infection. These people should seek advice about drinking water from their health care provider. CDC's Guidelines for Drinking Water Quality provides guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants that may be present in the public drinking water supply.

On 30 December 2023, under the lead of Compliance and Monitoring Sub-Committee (CMSC), Fort Irwin collected data for chemicals that are regulated contaminants in drinking water. Testing was completed for perfluorinated compounds (PFCs) with suitable performance metrics for PFCs and performance metrics for PFAS. All testing results obtained were shared on 12/29/23. On 21 February 2024, the US Army Public Health Center, conducted additional data for PFCs and PFAS. All testing results obtained were shared on 2/29/24. Fort Irwin will
