To summarize report delivery used and good-faith efforts taken, please complete the below by checking all items that apply and fill-in where appropriate:

CCR was distributed by mail or other direct delivery methods. Specify other direct delivery methods used:

"Good faith" efforts were used to reach non-bill paying consumers. Those efforts included the following methods:

Posting the CCR on the Internet at www.

☒ Mailing the CCR to postal patrons within the service area (attach zip codes used) 93460

Advertising the availability of the CCR in news media (attach copy of press release)

Publication of the CCR in a local newspaper of general circulation (attach a copy of the published notice, including name of newspaper and date published)

Posted the CCR in public places (attach a list of locations)

Delivery of multiple copies of CCR to single-billed addresses serving several persons, such as apartments, businesses, and schools

Delivery to community organizations (attach a list of organizations)

Other (attach a list of other methods used)

For systems serving at least 100,000 persons: Posted CCR on a publicly-accessible internet site at the following address: www.

For investor-owned utilities: Delivered the CCR to the California Public Utilities Commission

This form is provided as a convenience for use to meet the certification requirement of the California Code of Regulations, section 64483(c). Instructions for Small Water Systems, Appendix F

Santa Ynez Rancho Estates Mutual Water Company, Inc.

Post Office Box 297 • Santa Ynez, California 93460

Rec'd 13 Jun 2020

June 10, 2020

To all Members:

As shareholders in our private mutual water company, we all own a valuable resource that includes water production (wells), storage (facility and land), and the distribution system serving Santa Ynez Rancho Estates.

As a private mutual water company, we operate under requirements set forth by federal, state, and local agencies regarding standards for drinking water. Distribution of this annual report by July 1st each year is one of those requirements.

The water delivered to you by SY Rancho Estates MWC meets all current California and federal water quality requirements.

Enclosed is your 2019 Consumer Confidence Report (covering water testing through December 2019). This report provides information concerning the quality of the water delivered to you by your water company. You are required to provide this information to any tenants, and may call Johnson and Johnson (688-4415) to request extra copies if needed. This report contains useful information, and we encourage you to read it in its entirety.

Many tests are required on a less than annual basis. The results reported are for the most recent tests prior to Dec 31, 2019. We test for many more potential contaminants than those listed, but per state instructions generally do not report any for which there is "none detected". For example: pesticides, asbestos, and many other potentially harmful contaminants.

Water sampling and test oversight is provided by Fluid Resource Management (FRM) of Arroyo Grande. FRM also assigns state Certified Water Operators and Water Treatment Specialists to provide oversight or guidance on maintenance and repairs when requested. The following 2019 CCR was prepared by Fluid Resource Management.

As you are aware, starting in December of 2016 we initiated continuous voluntary low level chlorination to help ensure that we continue to meet water quality requirements. Fluid Resource Management monitors the chlorination level on a weekly basis at four locations in our system. Summarized results of that monitoring are included in the following report.

The CCR contains information on agencies you may contact for water quality questions. Additionally, please contact Johnson and Johnson with any specific questions you may have which they will relay to the appropriate board member.
