RE: 2020 Annual Consumer Confidence Report for Drinking Water

Campus Community,

The annual Consumer Confidence Report is provided to inform the campus community about the quality of drinking water that facilities management delivers to the Sonoma State campus every day. The goal is to consistently provide a safe and dependable supply of drinking water that meets or exceeds federal and state drinking water standards. This report demonstrates the quality of the water produced at SSU.

Sonoma State University routinely monitors for contaminants in the drinking water according to federal and state regulations. The 2020 Consumer Confidence Report for Drinking Water can be found on the Environmental Health and Safety [website](#). All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of contaminants. It is important to remember the presence of these contaminants does not necessarily pose a health risk.

If you have any questions about this report, please contact the Department of Environmental Health and Safety at (707) 664-2100.
