CITY OF N

Report Date: June 1, 2023

The City of Newman protects and maintains the quality of our water by:

- Drinking Water Source Assessment and Well Head Protection of the City's wells.
- Monitoring current research and regulations on drinking water.
- Enforcing our Backflow Prevention and Cross-Connections program.

For more information on your water quality or questions about this report, please contact the City of Newman Public Works Department at (209) 862-4448 or (209) 862-3725, Ext. 3. City Council meetings are regularly scheduled on the second and fourth Tuesday of every month at 938 Fresno Street, Second Floor, for public participation, and all water customers are welcome to attend.

This report, produced by the City, conforms to the federal regulation that requires each community water system to provide customers with annual information about the quality of the drinking water. This includes details about sources and quality; regulations that protect public health; programs that protect the water quality of our supply sources; and the treatment that assures our drinking water meets or surpasses all Federal and State standards. We hope the information presented here enhances your understanding and gains your confidence in the quality and integrity of the water you drink and use everyday.

From the Source to the tap

The City of Newman's water is supplied from five deep ground water wells. These wells are operated and maintained by certified operators. The City's water supply is disinfected using chlorine in the form of Sodium Hypochlorite at an average chlorine residual of 0.4 mg/l (parts per million). These wells are the only source of supply available at the present time. To make sure your water is consistently safe, water samples are taken on a weekly basis. Samples are drawn from numerous locations throughout the water distribution system and also directly from the wellhead prior to chlorination. Our certified operators, and Geo Analytical laboratories, a contract state certified water quality laboratory test samples both in-house and in the lab. These tests verify that our water supply continues to meet or exceed water quality standards established by state and federal regulatory agencies.
