The 2018 Water Quality Report for the City of Ceres is now available online!

The City of Ceres is pleased to present you with the annual Drinking Water Report for 2018, also known as the Consumer Confidence Report. The United States Environmental Protection Agency (EPA) and the California Division of Drinking Water require that all water agencies produce an annual report on the previous year's data informing customers about the quality of their water. In this report you will find details about where your water comes from, different types of contaminants, how the water is monitored and treated to remove any impurities. In 2018, as in past years, your tap water has met all state and federal drinking water standards.

In an effort to be more environmentally responsible, we will no longer be printing copies of this report for every resident within the community, instead we have made the report available on the City of Ceres Website. Please visit us online to view the report at:
