TUD RELEASES ANNUAL WATER QUALITY REPORT ON DRINKING WATER

SONORA, CA: Tuolumne Utilities District has released its **Annual Water Quality Report (also known as the Consumer Confidence Report)** covering all testing of treated drinking water performed from January 1st through December 31, 2017. The water quality report covers the 11 water service areas the District serves, 11 surface water treatment plants, and 12 active wells. TUD's surface water comes from the South Fork of the Stanislaus River at Lyons Reservoir via the Tuolumne Main Canal by agreement with Pacific Gas and Electric Company (PG&E).

In an effort to reduce District expenses, the Annual Water Quality Report (Report) is available for the public to download at our website, www.tudwater.com. As new challenges to drinking water treatment and delivery emerge, TUD remains committed to meeting the goals of source water protection, water conservation, treatment process improvements, employee training and community education to serve the needs of all our water users.

In 1996, Congress amended the Safe Drinking Water Act, adding a requirement that water systems deliver to their customers an annual water quality report. The Report includes information on source water, levels of any detected contaminants, and compliance with drinking water regulations (including monitoring requirements), and educational information.

For more information regarding TUD's water supply, go to <https://tudwater.com/customer-service/water-services/>
